WELCOME

Before you begin

Hello, music lover

GEN-Z Music for Windows is a music player for your PC – no account, no ads, no subscription. Just your songs, played beautifully.

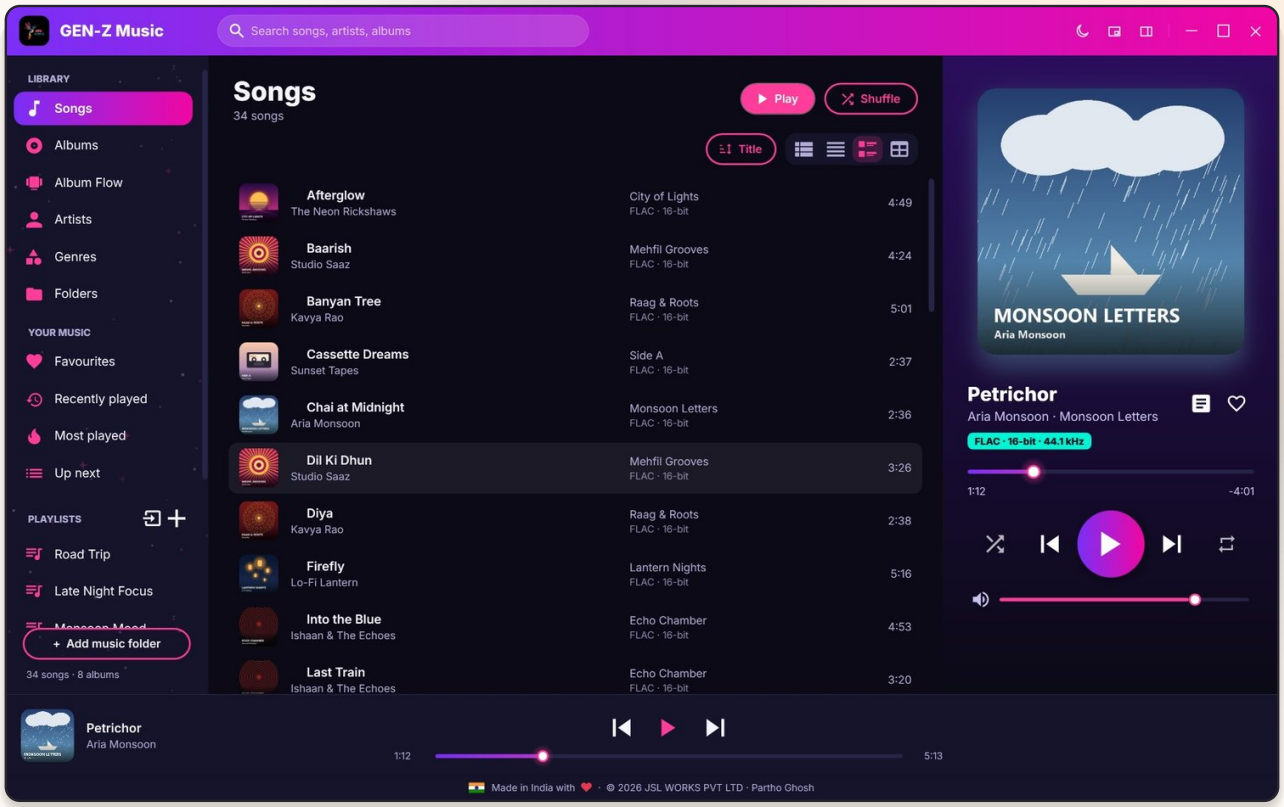

If you know GEN-Z on Android, you will feel at home: the same 42 themes, the same fonts, the same playful animations – now on a big screen with a mouse, a keyboard and room for the Now Playing panel right beside your library. If GEN-Z is new to you, welcome! This guide walks you through everything it can do, with screenshots of the real app on every page.

Start with **Installing GEN-Z** and **A tour of the window**, then jump to whatever you're curious about. Boxes marked TIP are shortcuts worth knowing; boxes marked NOTE explain the few things Windows decides for us.

What makes GEN-Z for Windows different

- **Works offline.** Your songs, playlists and settings stay on your PC. Online cover art and lyrics are there only if you switch them on.
- **Runs on old and new PCs.** From Windows 7 SP1 to Windows 11 – a Light mode keeps older PCs smooth, while 4K screens stay sharp and 120, 144 and 240 Hz monitors stay fluid.
- **Looks like your music.** 42 themes shared with the Android app – each with its own colours, fonts and progress bar.
- **Sounds great.** A 10-band equalizer with automatic headroom, and GEN-Z Home Theater: surround, clear dialogue and a volume leveller.
- **A real music library.** Albums, artists, genres, folders, playlists, synced lyrics, a tag editor and a sleep timer.
- **Fun to use.** Android's screen transitions and scroll animations, sparkling progress bars, space effects in the sidebar – and fireworks when you love a song.

CHAPTER 1

Set up in a minute

Installing GEN-Z

One Setup file puts GEN-Z in your Start menu, with a desktop icon and a proper uninstaller.

System requirements

GEN-Z is light enough for a ten-year-old laptop and polished enough for a 4K gaming monitor. On older PCs it switches itself to **Light mode** (chapter 11) so it stays smooth.

	Minimum (older PCs)	Recommended
Windows	7 SP1, 8 or 8.1 – 32- or 64-bit	10 or 11
.NET	Framework 4.8 (Setup links to it if missing)	Already part of Windows 10 (May 2019 update) and 11
Processor	1 GHz, 1–2 cores (Pentium, Celeron, Atom class)	2 GHz, 4 cores or more
Memory	2 GB RAM	4 GB RAM or more
Graphics	Any – software drawing works without a graphics card	DirectX 9 or later with a WDDM driver

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

	Minimum (older PCs)	Recommended
Screen	1024 × 768	1920 × 1080 or more · 4K and 120 / 144 / 240 Hz supported
Disk	About 15 MB, plus any covers and lyrics you download	Same
Sound	Any Windows output device (WASAPI or DirectSound)	Same
Internet	Not needed	Only for the optional online covers and lyrics

Step by step

1. Download **GEN-Z-Music-Setup-1.5.x.exe** from the updates page and double-click it.
2. If Windows shows **Windows protected your PC**, click **More info**, then **Run anyway**. This appears because the app is not yet signed with a paid certificate – it does not mean anything is wrong.
3. Choose **Install for me only** (recommended, no administrator password needed) or **Install for all users**.
4. Read the **Terms and Conditions**, select **I accept** and click **Next**. The next page lists the open-source parts GEN-Z uses.
5. Keep or change the folder, choose a **desktop shortcut** and the **Open with** entry for music files, then click **Install**.
6. Leave **Start GEN-Z Music now** ticked and click **Finish**.

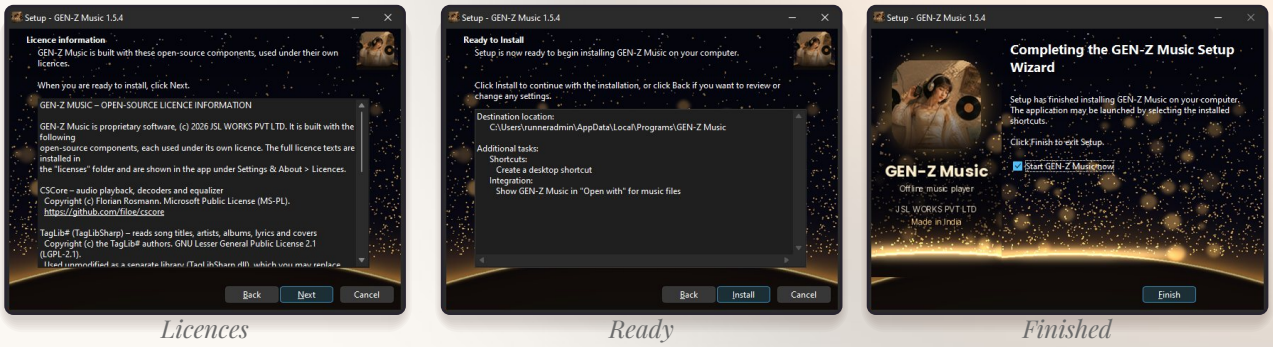

Install mode

Terms and Conditions

Choose who GEN-Z is for, then accept the Terms and Conditions.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Licences *Ready* *Finished*

Licence information, ready to install, and the finish page — all in the golden-horizon design.

TIP Installing **for all users** also pre-compiles GEN-Z for your PC during Setup (you'll see "Optimising GEN-Z Music for this PC…"), so it opens faster every time.

The portable copy

Prefer not to install? Unzip **GEN-Z-Music-Windows.zip** into a folder you'll keep – for example on a USB stick – and open **GEN-Z Music.exe**. The first time, GEN-Z shows its Terms of use; click **I accept the terms**. Deleting that folder removes the app.

Updating and uninstalling

To update, run the newer Setup – it installs over the old version and keeps your library, playlists, themes and settings. To remove GEN-Z, open **Settings › Apps** (or **Control Panel › Programs**) and choose **GEN-Z Music › Uninstall**. Your settings live in `%APPDATA%\GEN-Z Music`; delete that folder too if you want a completely fresh start.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 2

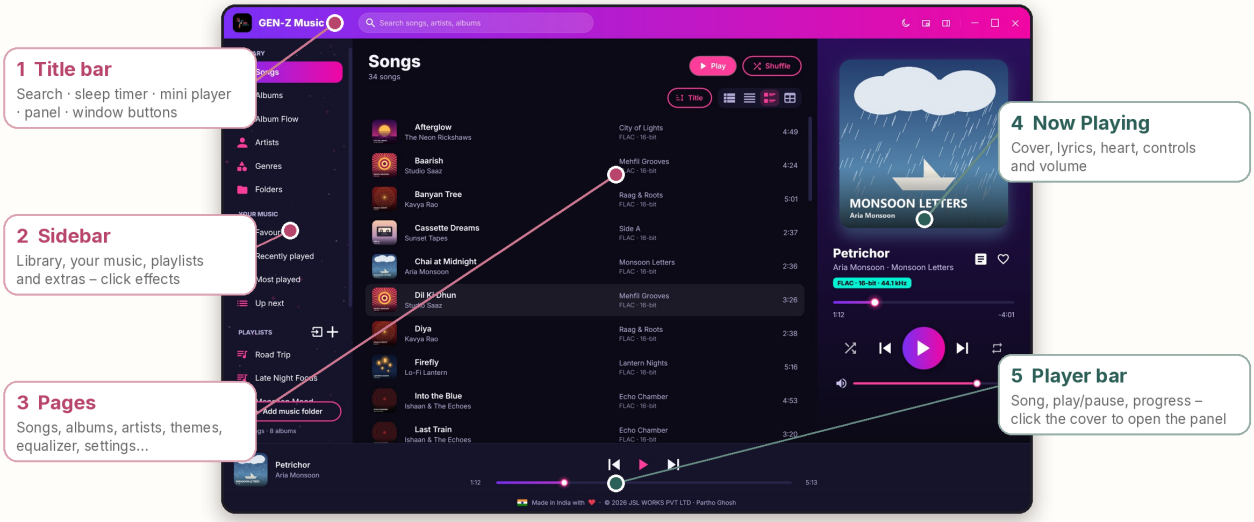

Find your way around

A tour of the window

Five areas, all on one screen — and everything is one click away.

The GEN-Z window

Five areas — everything is one click away

Drag the edges to resize — the interface scales itself and stays sharp on 4K screens.

Area	What it does
Title bar	The GEN-Z name, the search box, and – on the right – the sleep timer, mini player, Now Playing panel and window buttons.
Sidebar	Library (Songs, Albums, Album Flow, Artists, Genres, Folders), Your music (Favourites, Recently played, Most played, Up next), your Playlists and Extras.
Pages	Whatever you chose in the sidebar. Most pages have a view switcher and a sort menu at the top right.
Now Playing	The cover, title and artist, the format badge, the heart, lyrics, the progress bar, controls and volume.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Area	What it does
Player bar	The current song with play controls and progress. Click its cover or title to bring back a hidden Now Playing panel.

The title bar

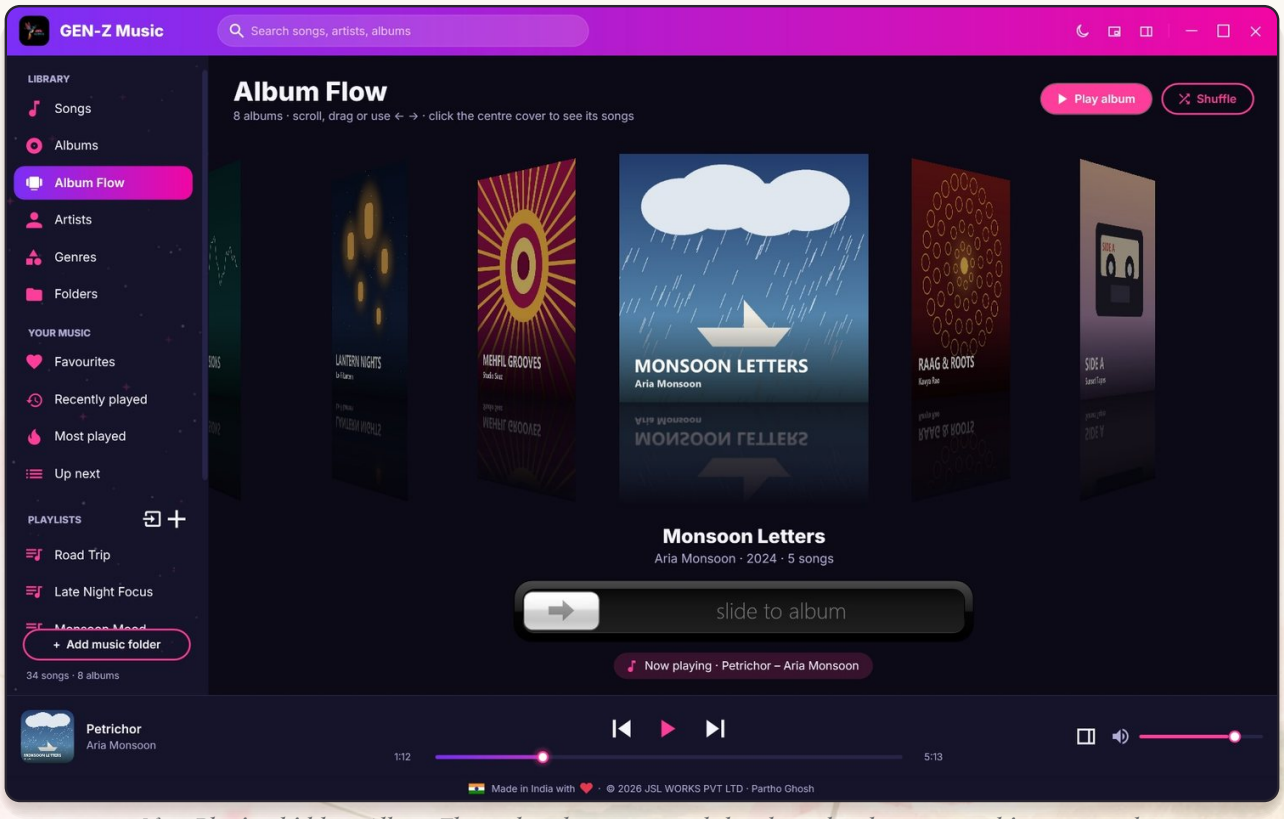

The buttons at the top right follow your theme's colours. From the left: the **moon** opens the sleep timer, the next button opens the **mini player**, the panel button shows or hides **Now Playing** (it slides smoothly), and then minimize, maximize/restore and close. Close turns red when you point at it.

The title bar: search, sleep timer, mini player, Now Playing panel and window buttons.

More room for your library

Hide Now Playing with the panel button and the pages get the whole width; the player bar then shows the volume slider and a button to bring the panel back. While a song plays, hiding the panel also brings **Album Flow** to the centre, already turned to the album you're listening to (chapter 3). GEN-Z remembers your choice.

Now Playing hidden: Album Flow takes the centre, and the player bar keeps everything you need.

Sharp on every screen

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

GEN-Z scales its whole interface to the window: smaller windows shrink it so nothing is cut off, big and 4K screens enlarge it. It draws itself at your display's exact scaling on every monitor, so text and covers stay crisp. Prefer a fixed size? Choose one in **Settings & About › Interface size** (80% to 150%).

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 3

Browse and organise

Your library

Songs, albums, Album Flow, artists, genres and folders – each in the view you like best.

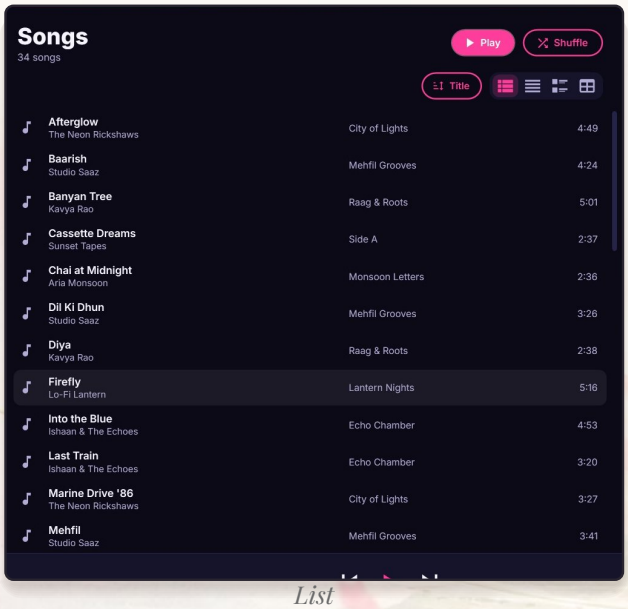

Adding your music

The first time GEN-Z starts, it looks in your **Music** folder. To add more, click **+ Add music folder** at the bottom of the sidebar (or in Settings & About), pick a folder, and GEN-Z scans it in the background. Changed files are noticed on the next scan; **Rescan library** runs one straight away. You can also drag files or folders from File Explorer onto the window to play them.

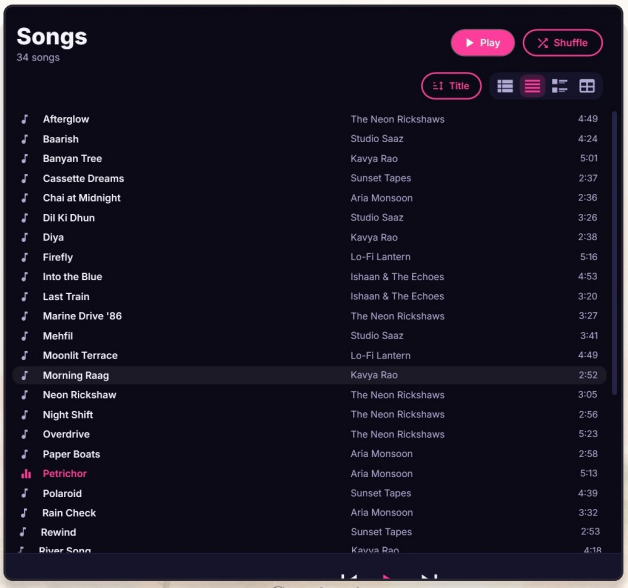

FORMATS MP3, FLAC, WAV, AIFF, M4A / AAC and WMA. Hi-res FLAC and WAV play at their full resolution – look for the format badge, for example **FLAC · 24-bit · 96 kHz · HI-RES**.

Four ways to see your songs

Every song list – Songs, Favourites, search results, album and artist pages, playlists and Up next – has four looks, chosen with the switcher at the top right. GEN-Z remembers your choice.

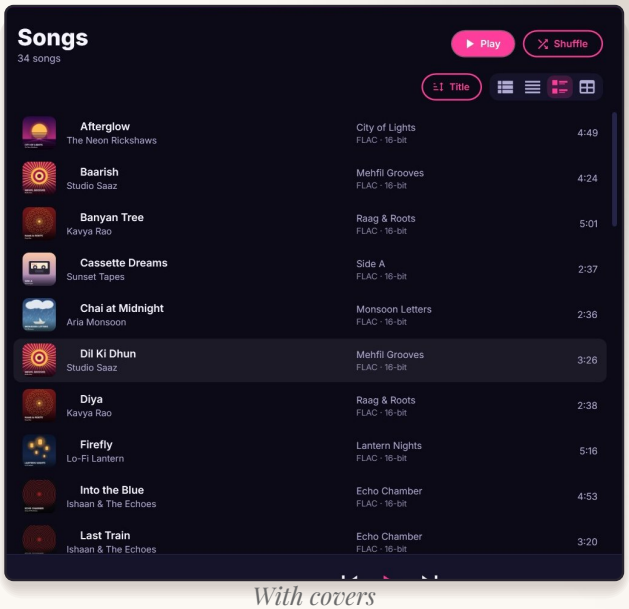

List

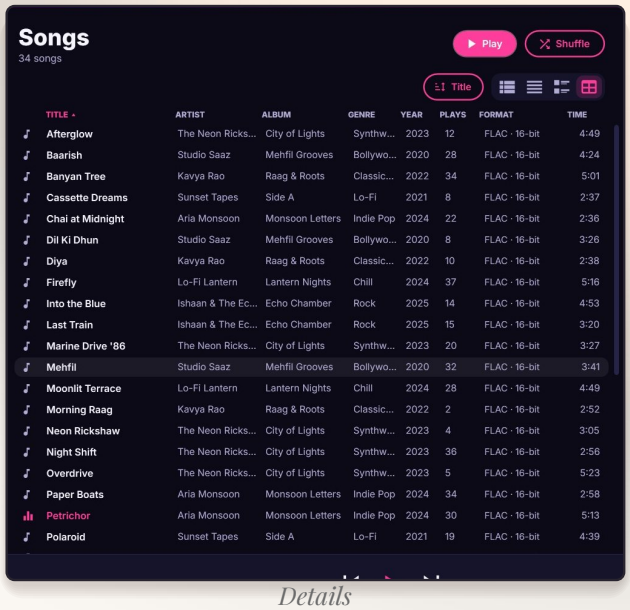

Compact

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

With covers

Details

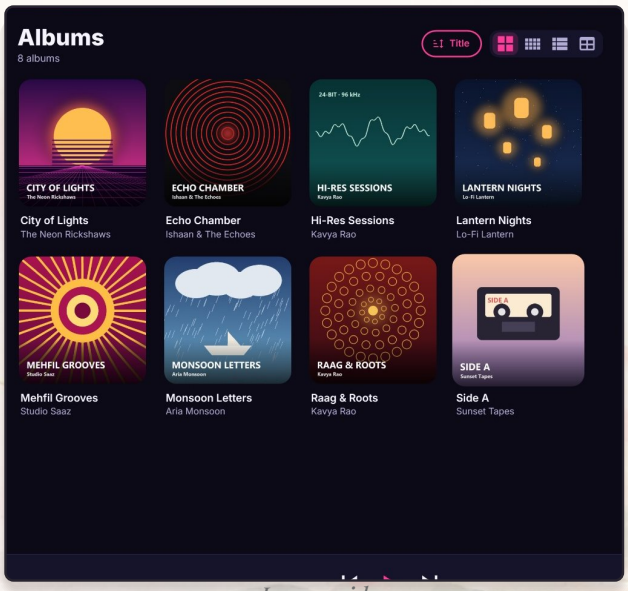

With covers shows each album's art and format; Details is a table you can sort by clicking a column heading.

Sorting

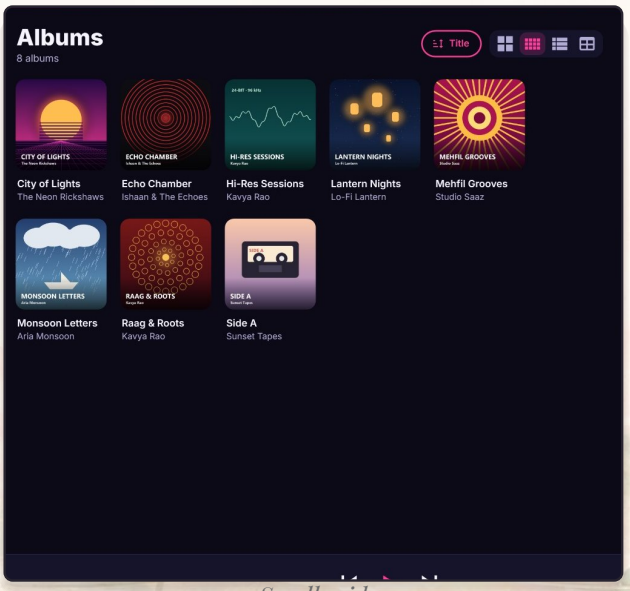

Click the sort button (it shows the current order, such as **Title**) and choose Title, Artist, Album, Year, Length, Date added or Most played – then **Normal** or **Reverse** order. Album and artist pages also offer **Track order**. Up next, playlists, Recently played and Most played keep their own order.

Albums, artists, genres and folders

These pages show tiles with covers. Switch between a **large grid**, a **small grid**, a **list** and **details** (with sortable columns for artist, year, number of songs and length). Click a tile to open it; the ← button, **Alt +** ← or your mouse's back button takes you back.

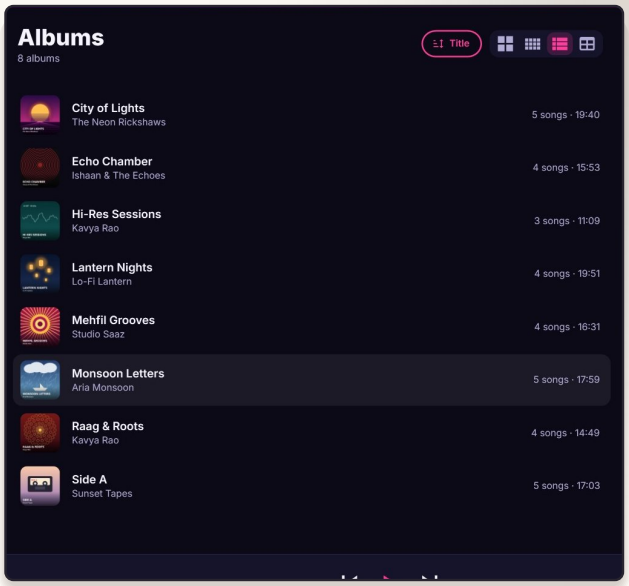

Large grid

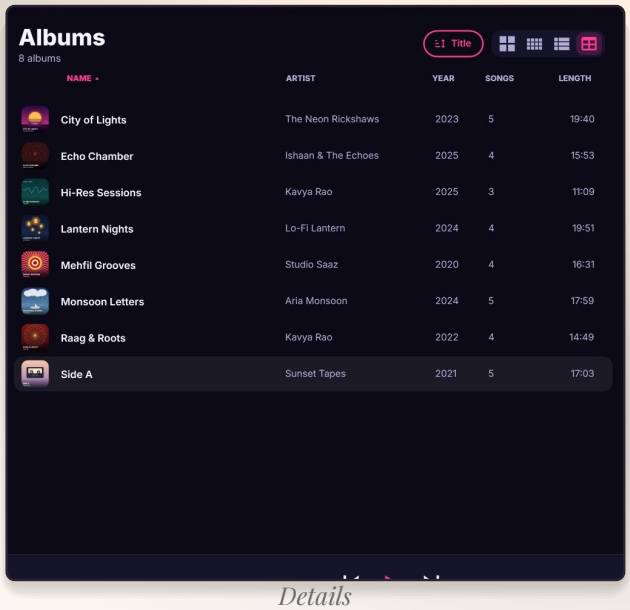

Small grid

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

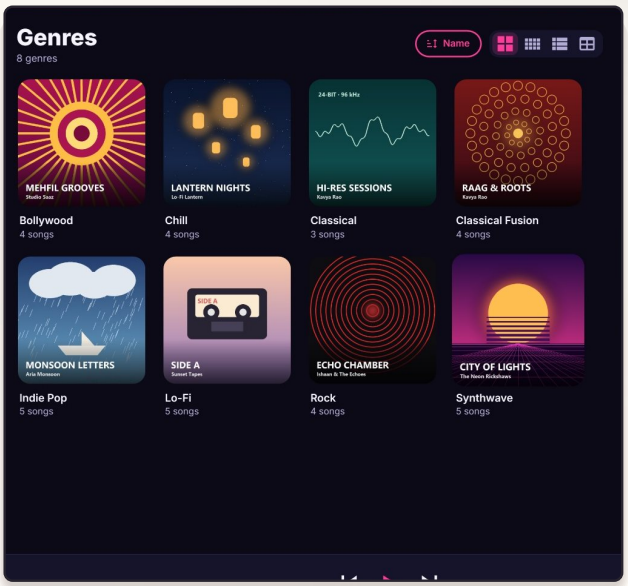

List

Details

An album

Genres

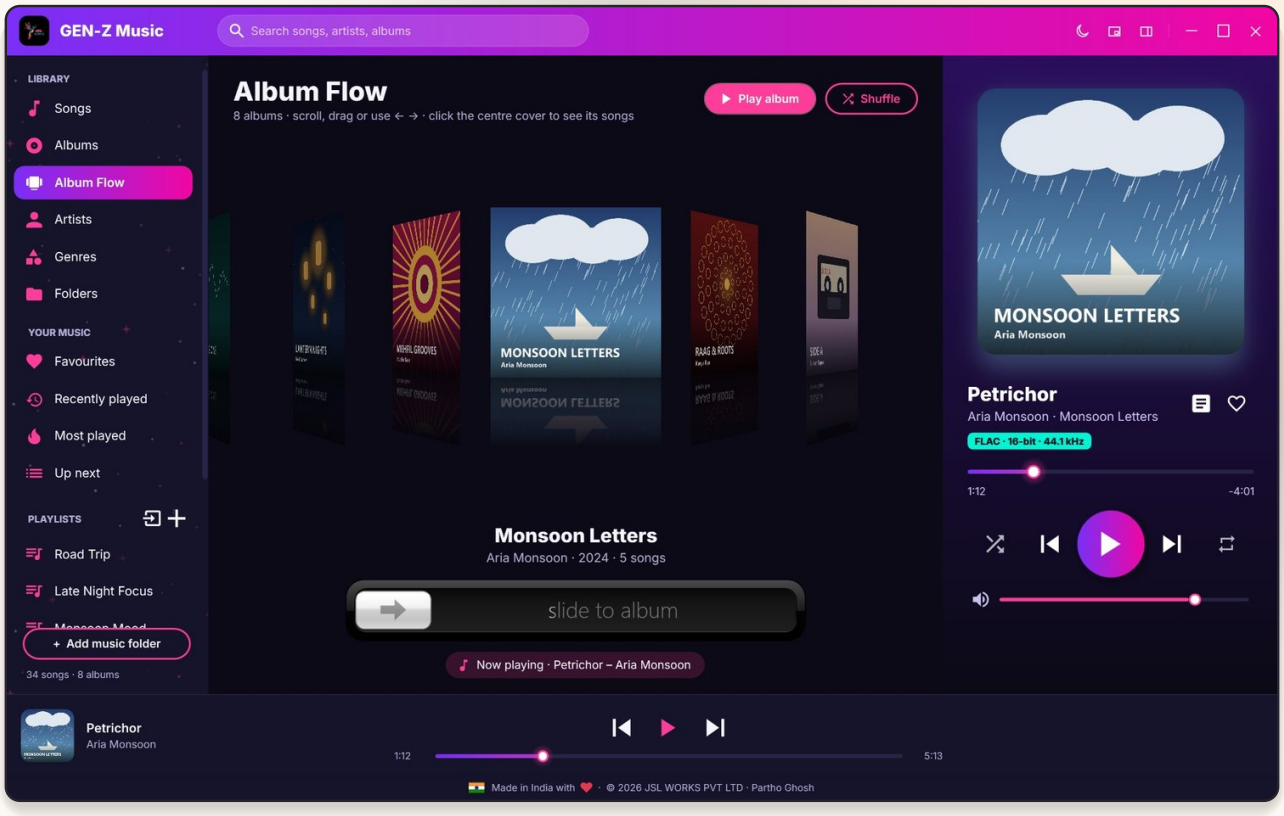

An album page with its back button, and genres as tiles.

Album Flow

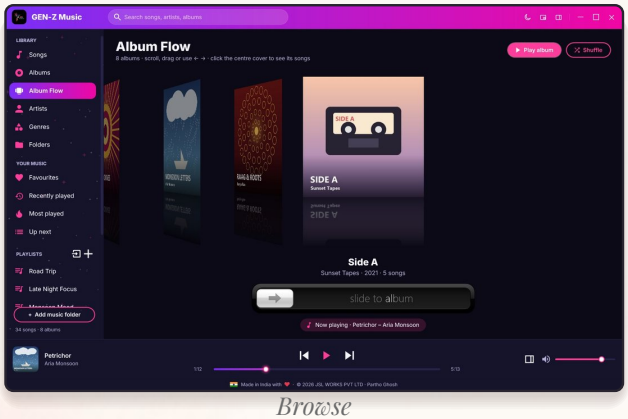

The classic album carousel from GEN-Z on Android, in real 3D: tilted covers with mirror reflections. Open **Album Flow** in the sidebar – it starts on the album that's playing.

- **Browse** with the mouse wheel, by dragging the covers, with ← →, **Home** and **End**, or with the **slide to album** bar – drag its silver knob and it glides back when you let go. Click a side cover to bring it to the centre.
- **Flip** the centre cover with a click (or **Enter**) to see its songs; click a song to play it, and press **Esc** or × to flip back.
- **Play** the whole album with **Play album**, a double-click on the centre cover, or **Ctrl + Enter**; **Shuffle** mixes it.
- The **Now playing** pill under the slider brings the playing album back to the centre.

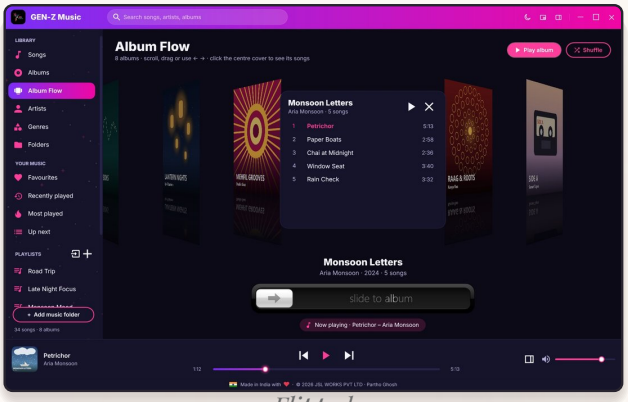

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Album Flow next to Now Playing.

Browse

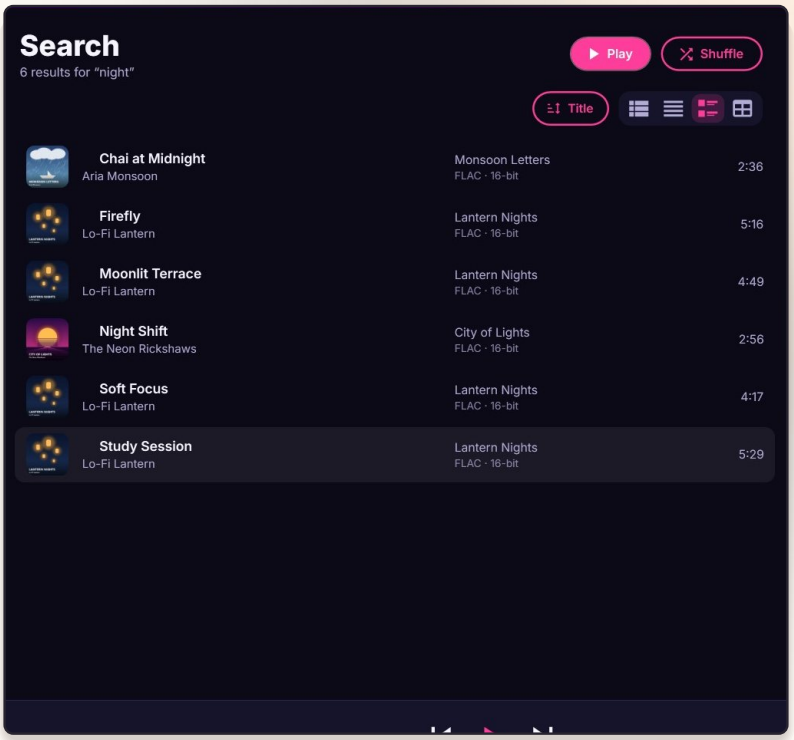

Flipped

Browsing the covers, and a flipped cover showing its songs.

Search

Click the search box in the title bar (or press **Ctrl + F**) and type. Results appear as you type, matching titles, artists, albums and genres. Press **Esc** to clear it.

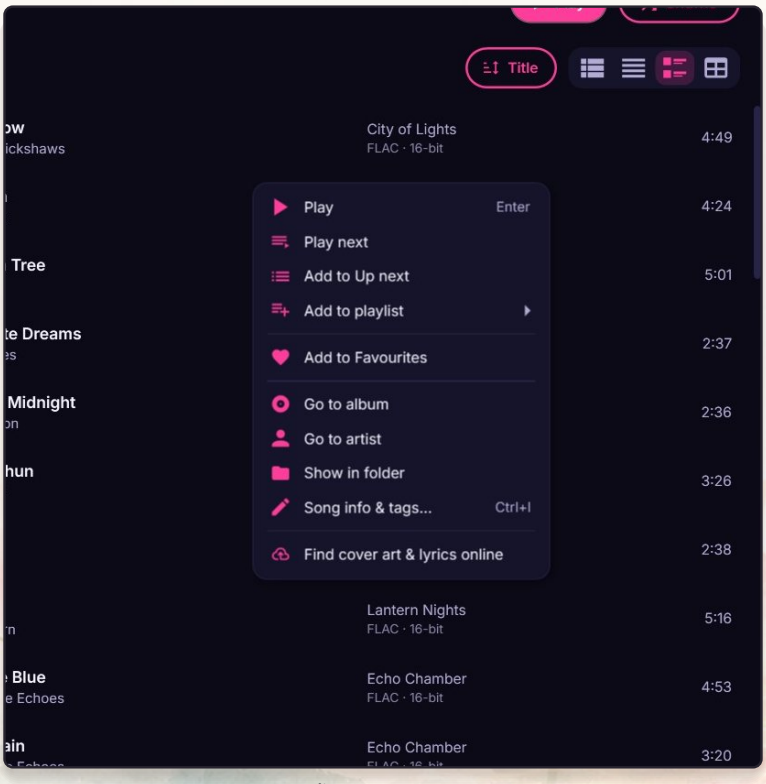

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Searching for "night".

The right-click menu

Right-click any song – or select several with **Ctrl** or **Shift** and right-click them together – for everything you can do with it. Album, artist, genre and folder tiles have the same menu for all their songs.

The song menu.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Menu item	What it does
Play · Play next · Add to Up next	Play now, right after the current song, or at the end of the queue.
Add to playlist	Pick a playlist, or create a new one with the songs already in it.
Add to / Remove from Favourites	The same as the heart on Now Playing – with the celebration.
Go to album · Go to artist	Opens the album or artist page.
Show in folder	Opens File Explorer with the file selected.
Song info & tags…	The tag editor (chapter 5).
Find cover art & lyrics online	An optional online look-up (chapter 10).

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 4

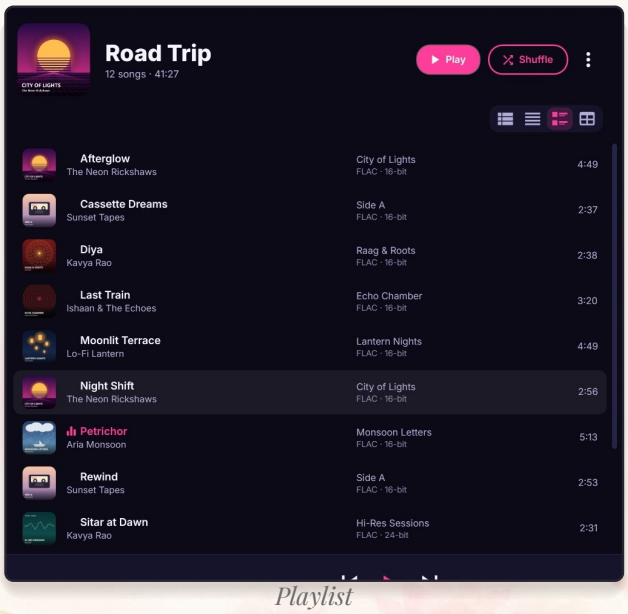

Your music, your way

Playlists and Up next

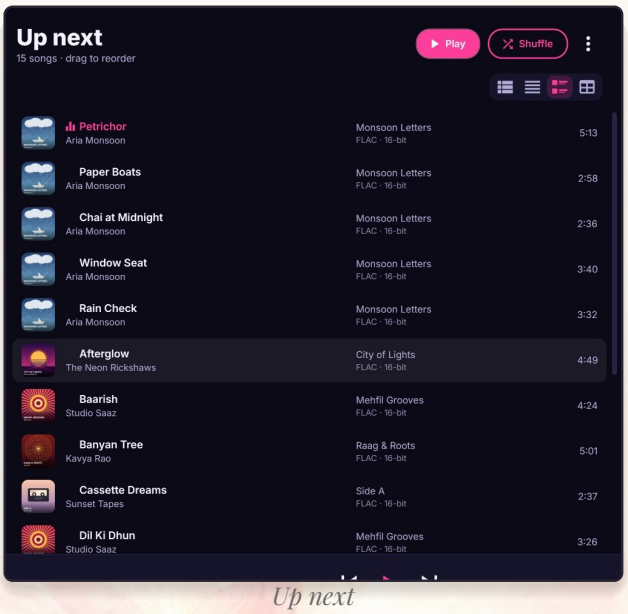

Make playlists, line up what plays next, and let GEN-Z remember what you love.

Playlists

- **Create** one with the **+** next to PLAYLISTS in the sidebar, with **Ctrl + N**, or from any song menu with **Add to playlist › New playlist…**
- **Add songs** from the right-click menu, or simply **drag songs onto a playlist** in the sidebar.
- **Reorder** by dragging songs up and down inside the playlist; remove them with **Delete** or the right-click menu.
- **Rename, export or delete** with the ⋮ button at the top of the playlist, or by right-clicking it in the sidebar.
- **Import and export M3U / M3U8** playlists to share them with other players.

Playlist

Up next

A playlist, and Up next — both can be reordered by dragging.

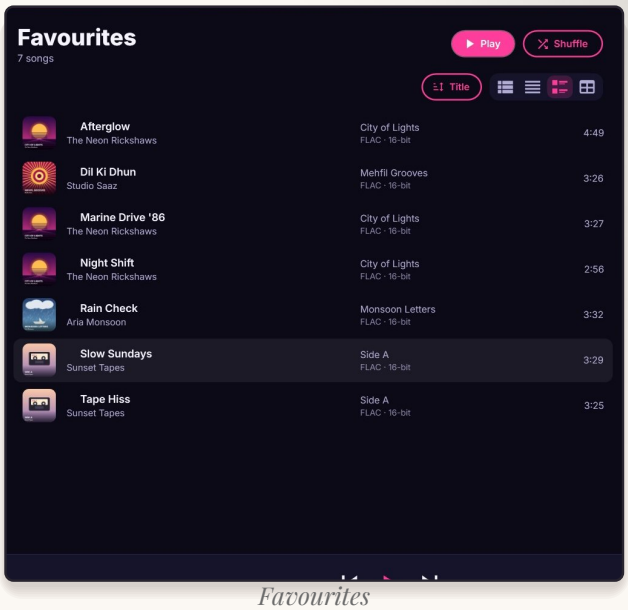

Up next

Up next is the queue of songs that will play. Drag to reorder, press **Delete** to remove, and use ⋮ **› Save queue as playlist** to keep it. When you close GEN-Z, it remembers Up next, the song and the exact position – press play tomorrow and it continues.

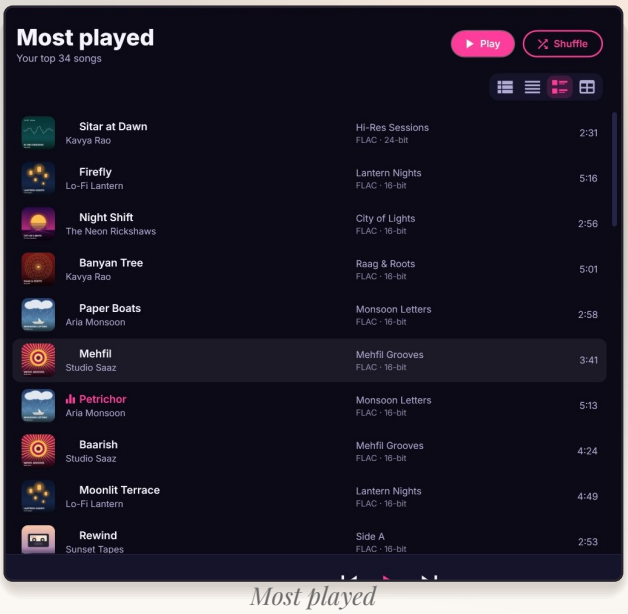

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Favourites, recently played and most played

Click the heart on Now Playing (or use the right-click menu) to add a song to **Favourites**. GEN-Z also keeps **Recently played** and counts plays for **Most played** – on your PC only.

Favourites

Most played

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 5

The player

Now Playing and lyrics

The cover, the controls, synced lyrics — and a song's details at your fingertips.

Now Playing *Lyrics*

Now Playing, and synced lyrics with the current line highlighted.

Control	What it does
Play / pause	Starts or pauses with a soft fade. Space does the same.
Previous · Next	Previous restarts the song if more than 3 seconds have played. Ctrl + ← / → work too.
Shuffle · Repeat	Repeat cycles off → all → one. Lit icons are on.
Heart	Adds the song to Favourites – with a celebration (chapter 9).
Lyrics button	Shows the lyrics over the cover (Ctrl + L).

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

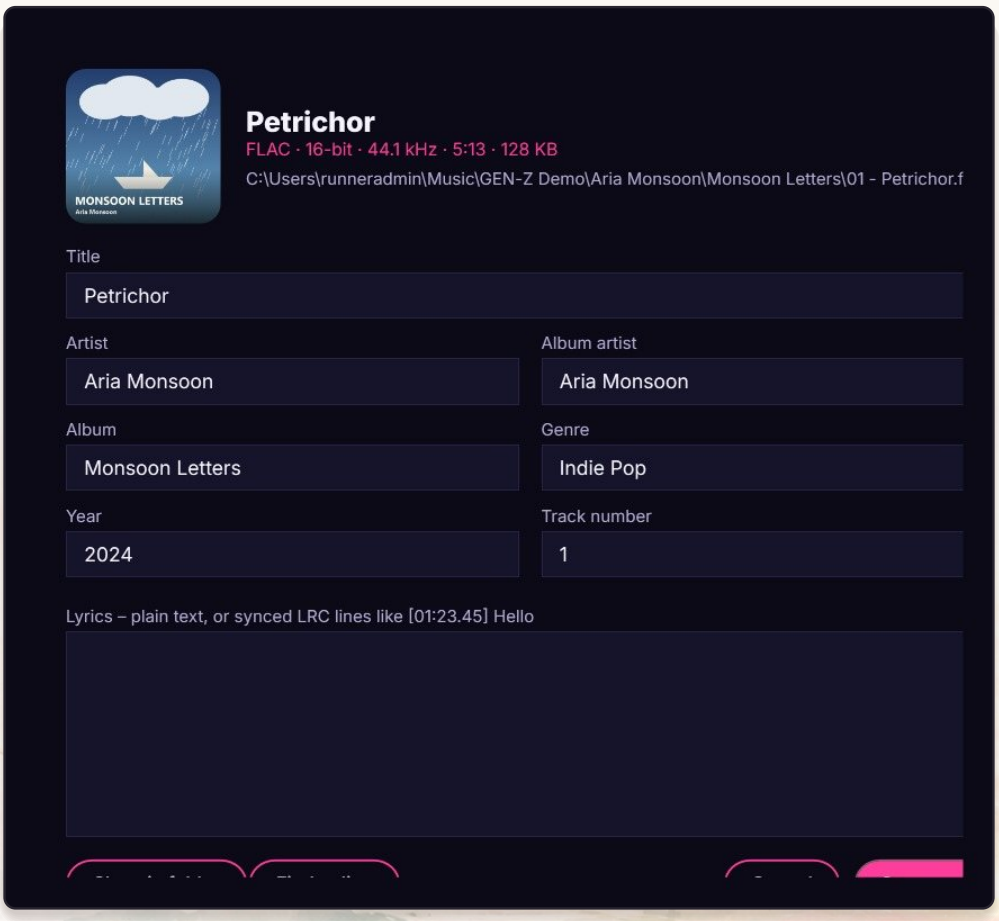

Control	What it does
Progress bar	Click or drag to seek. Its style comes from the theme.
Format badge	What you're hearing, such as FLAC · 16-bit · 44.1 kHz.
The cover	Click for a ripple or sparkle burst; right-click for the song menu.

Lyrics

GEN-Z shows **synced lyrics** that scroll with the music – the current line glows and grows a little, and you can click any line to jump there – as well as plain lyrics. It looks for a **.lrc** file with the same name next to the song, lyrics saved in the song's tags, and lyrics you found online. Scroll with the mouse wheel to read ahead; GEN-Z follows the music again a few seconds later.

Song info and the tag editor

Right-click a song › **Song info & tags…** (or press **Ctrl + I**) to see its format, length, size and location, and to edit the title, artist, album, album artist, genre, year, track number and lyrics. **Find online** fills in the details and a high-quality cover for you to review; **Save tags** writes them into the file.

Song info: check the details, find them online, and save.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 6

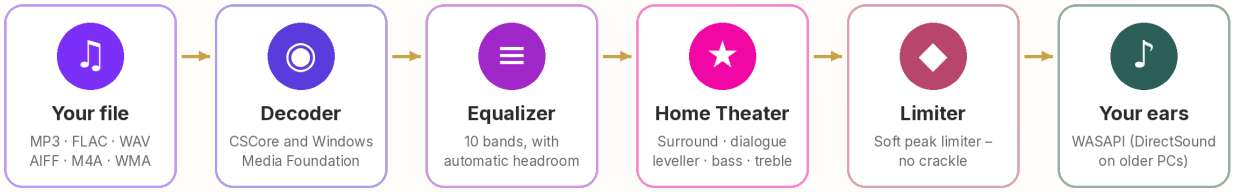

Tune the sound

Equalizer and Home Theater

Shape the sound exactly how you like it — inside GEN-Z, without touching Windows.

The journey of a song

What happens between your music file and your ears — all inside GEN-Z

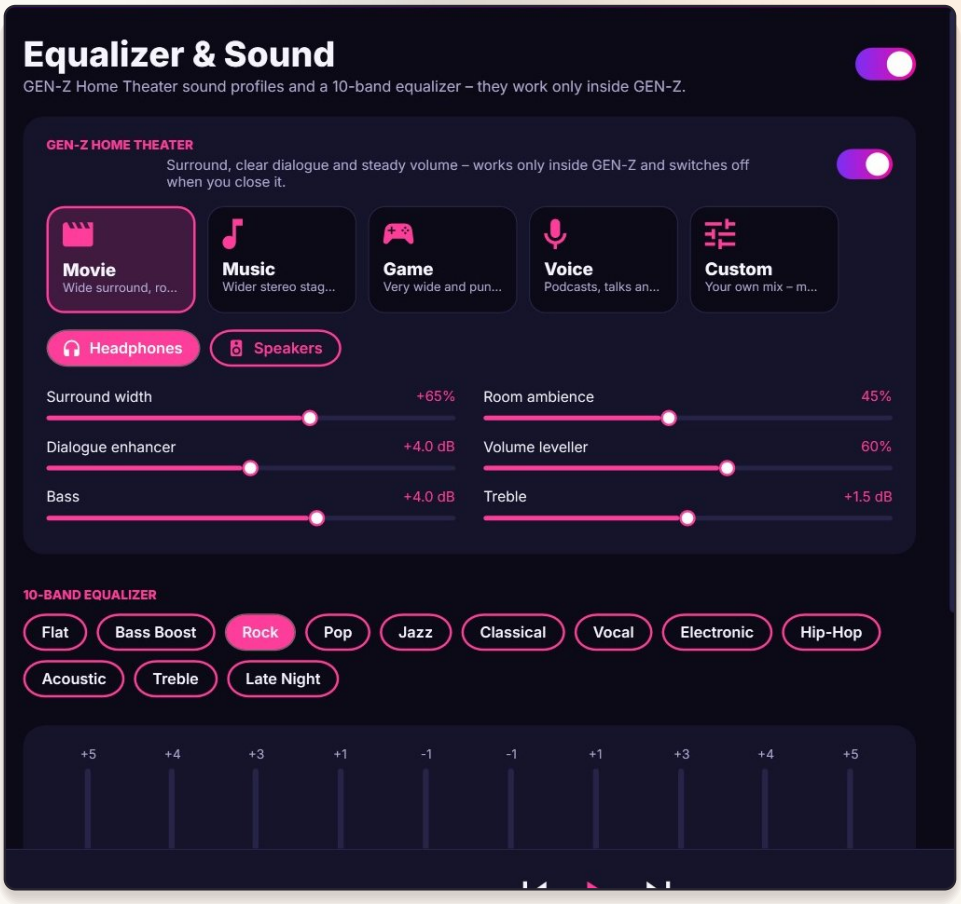

Soft fades on play and pause · the volume leveller and limiter keep loud songs clean

GEN-Z Home Theater

Open **Equalizer** in the sidebar. At the top is GEN-Z Home Theater, GEN-Z's own sound engine. Switch it on and pick a profile; choose **Headphones** or **Speakers** so the surround effect suits what you're listening on. It works only inside GEN-Z – nothing is installed into Windows, and it stops when you close the app.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Home Theater profiles with headphone and speaker modes.

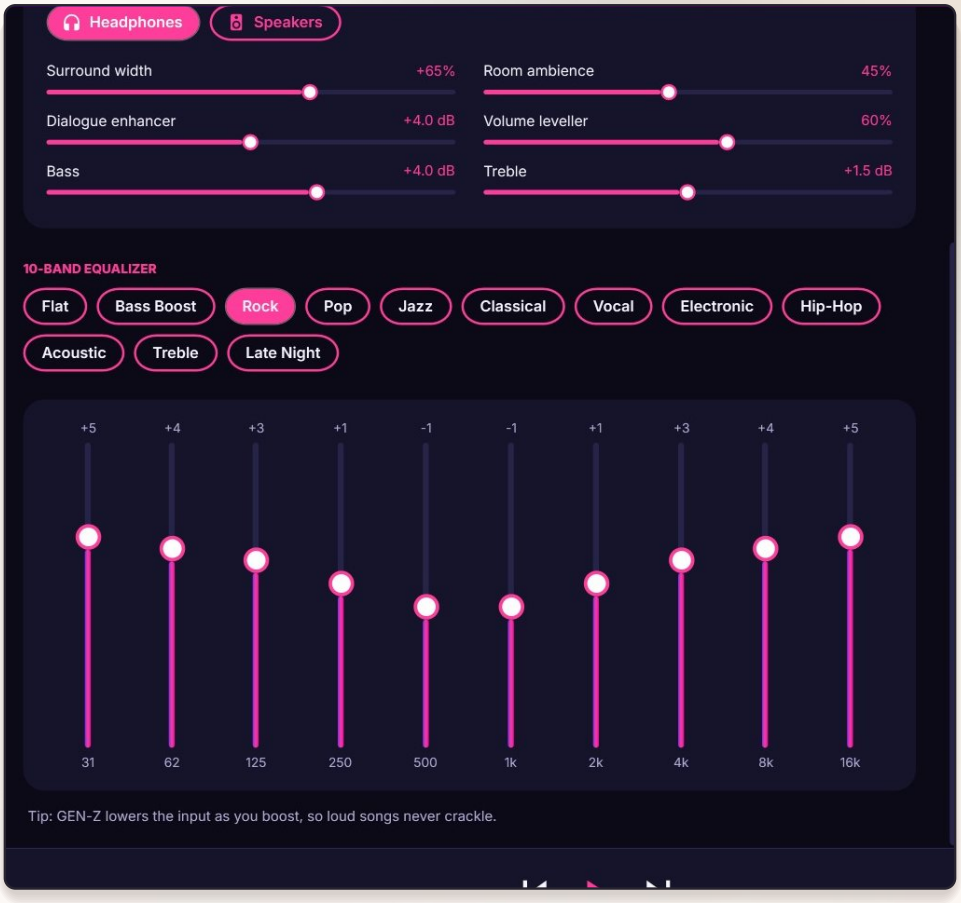

Profile	Best for	What it does
Movie	Films and series	Wide surround, room ambience and clear dialogue.
Music	Most music	A wider stereo stage with warm bass and airy highs.
Game	Games	Very wide and punchy – hear where things are.
Voice	Podcasts, talks, devotional speech	Crystal-clear voices and steady volume.
Custom	Your own mix	Move any slider and GEN-Z saves it as Custom.

Slider	What it changes
Surround width	How wide the sound feels – from normal stereo to very wide.
Room ambience	A touch of space, as if you were in a room rather than inside headphones.
Dialogue enhancer	Lifts voices in the centre of the mix.
Volume leveller	Evens out loud and quiet songs and scenes.
Bass · Treble	Warmth and sparkle, −6 to +9 dB.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

The 10-band equalizer

Below Home Theater is a 10-band graphic equalizer from 31 Hz to 16 kHz, with presets: Flat, Bass Boost, Rock, Pop, Jazz, Classical, Vocal, Electronic, Hip-Hop, Acoustic, Treble and Late Night. Drag any slider to make your own (it becomes Custom). The switch at the top turns the equalizer on and off.

Presets and the ten bands.

CLEAN BY DESIGN When you boost, GEN-Z lowers the input by the same amount and a soft limiter catches the peaks – loud songs never crackle.

Smooth playback

- **Soft fades** on play and pause (Settings & About › Playback).
- **Continue where you left off** – Up next, the song and its position are remembered when you close GEN-Z.
- **WASAPI output** on Windows Vista and later, with DirectSound as a fallback.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 7

Always on top

The mini player

Keep your music in a small window that floats above everything else.

Click the mini-player button in the title bar or press **Ctrl + P**. A small, always-on-top player appears with the cover, title, progress and controls; the main window minimizes. Drag it anywhere – GEN-Z remembers where.

- **Two looks:** the panel button in its corner switches between a compact bar and a big square cover.
- **Back to the full window:** double-click it, or use the expand button. The ✕ closes the mini player.
- **Alive with your music:** the cover flips in for each new song, slowly pans and zooms while playing, and glows with the beat.
- **Automatic:** turn on **Settings & About › Open the mini player when minimized**.

Compact *Cover*

The compact and cover looks of the mini player.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

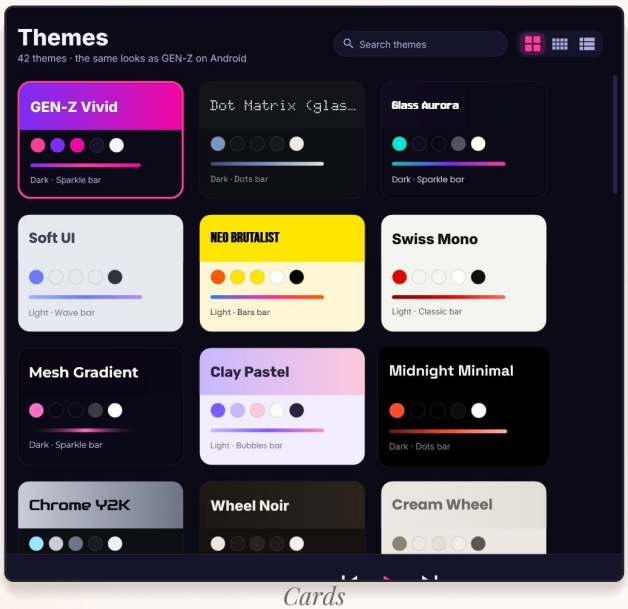

CHAPTER 8

Dress it up

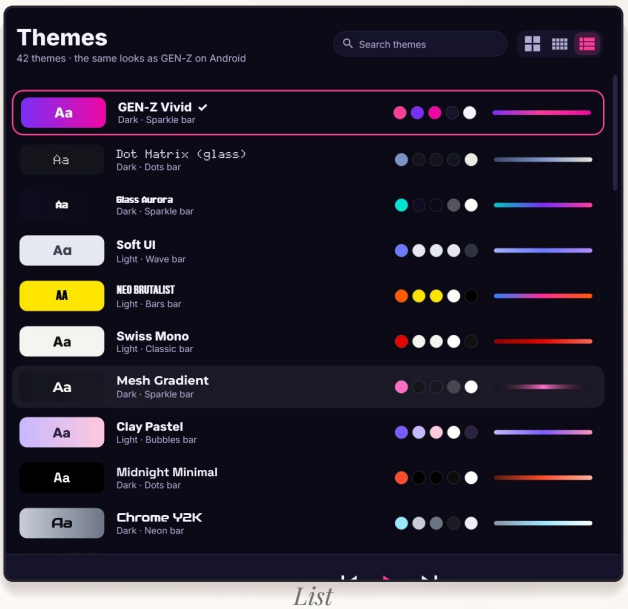

Themes

Forty-two complete looks shared with GEN-Z on Android – each with its own colours, fonts and progress bar.

Open **Themes** in the sidebar and click a theme. The whole app changes instantly – colours, fonts, the title-bar buttons, the progress bar and even the star field in the sidebar. Use the **search box** to find a theme by name, dark or light, font or bar style, and the view switcher for **cards**, **small cards** or a **list**.

Cards

List

Themes as cards and as a list.

Theme fonts

Every theme has two fonts, exactly as on Android: **bold text** – page titles, section labels, song titles – uses the theme's **heading font**, and everything else uses its **body font**. On the Themes page each theme's name is shown in its own heading font, as a preview.

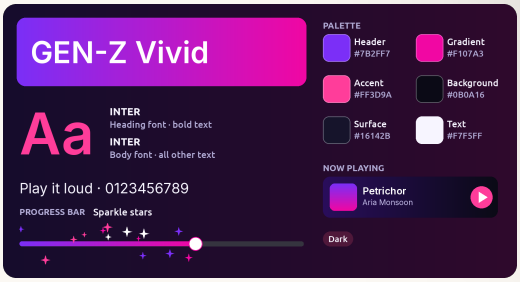

How to read a theme card

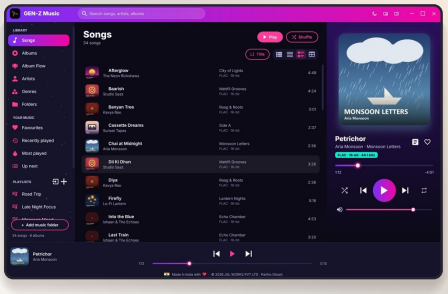

The following pages show four themes each. The card on the left sums up the theme: its name in its heading font, both fonts, its progress-bar animation, six key colours with their codes and a Now Playing sample. Next to it is GEN-Z for Windows in that theme.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

01 GEN-Z Vivid SIGNATURE

The signature GEN-Z look: violet-to-magenta header, hot-pink accents and a sparkling progress bar.

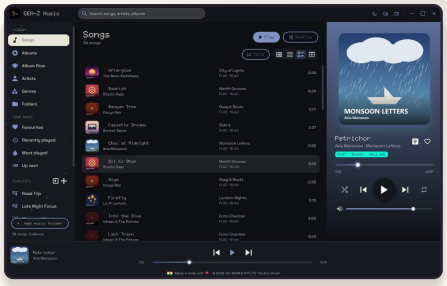

02 Dot Matrix (glass) MODERN GLASS

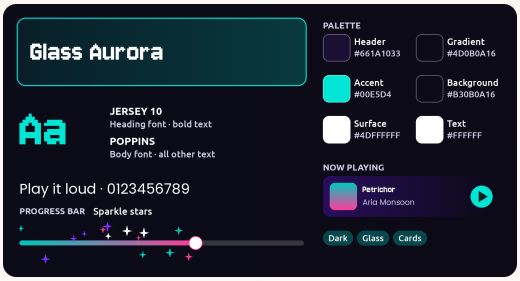

Translucent glass panels over your blurred cover, with Doto dot-matrix headings.

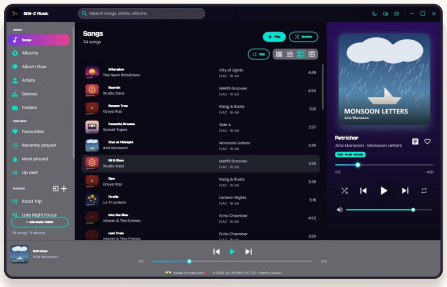

03 Glass Aurora MODERN GLASS

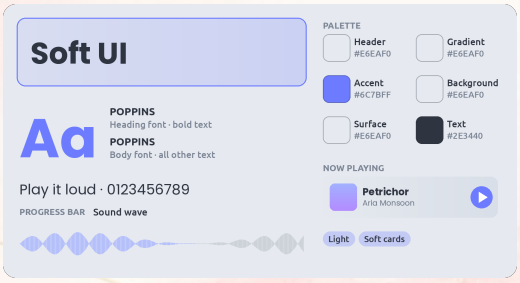

Frosted glass in teal, violet and pink; Now Playing follows the cover.

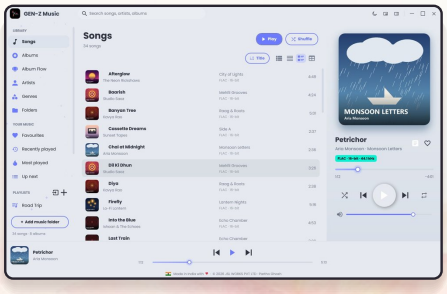

04 Soft UI MODERN SOFT

Neumorphic: buttons and cards rise softly out of a pale grey surface.

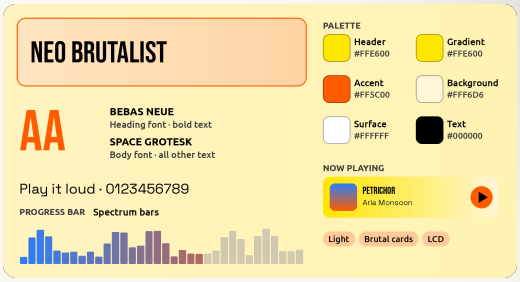

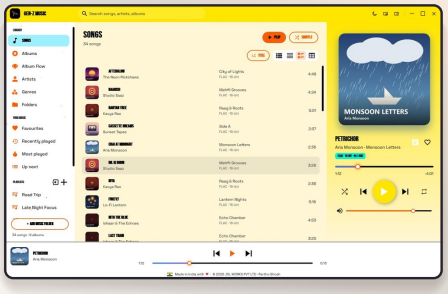

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

05 Neo Brutalist MODERN BOLD

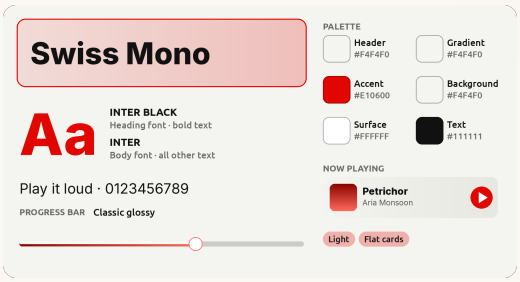

Thick black outlines, hard shadows and bold yellow — loud and playful.

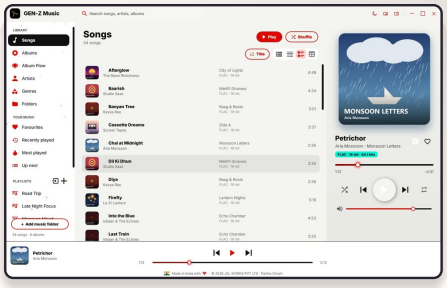

06 Swiss Mono MINIMAL

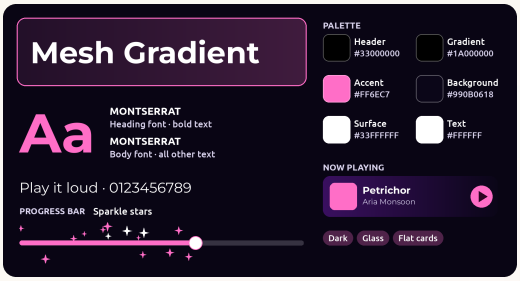

Clean Swiss typography: black, white and a single red accent.

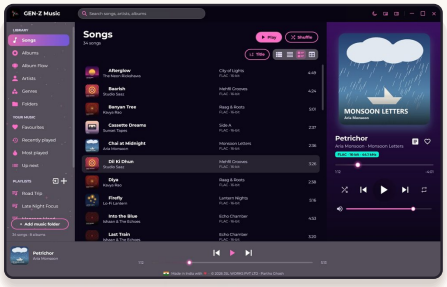

07 Mesh Gradient MODERN GLASS

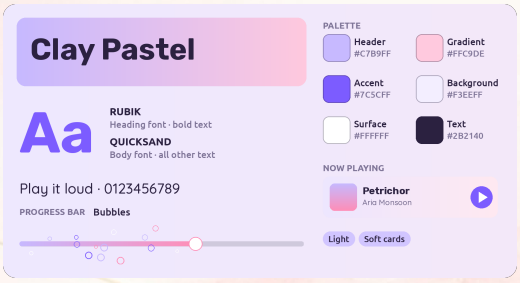

Glowing glass over the cover's own colours; every song repaints the app.

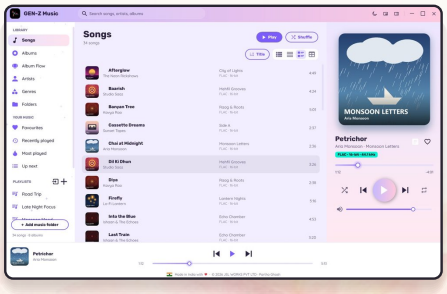

08 Clay Pastel SOFT PASTEL

Soft clay cards in lavender and pink with bubbly progress.

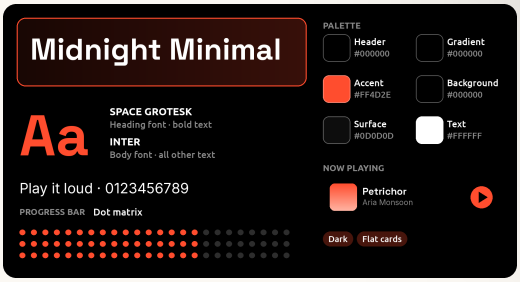

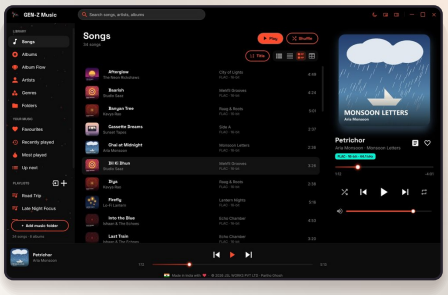

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

09 Midnight Minimal MINIMAL · OLED

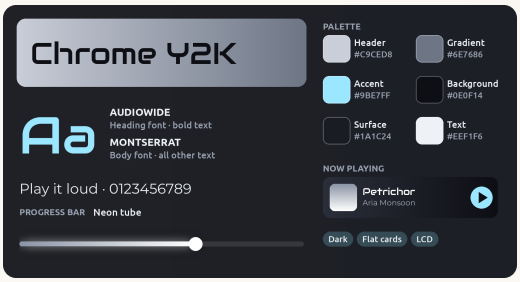

True black for OLED with one ember-orange accent and a dot-matrix bar.

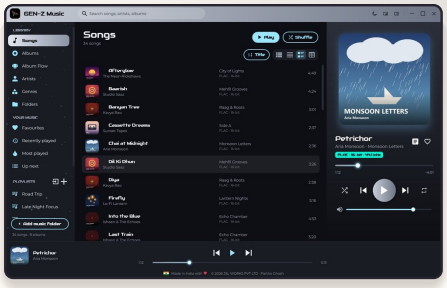

10 Chrome Y2K RETRO-FUTURE

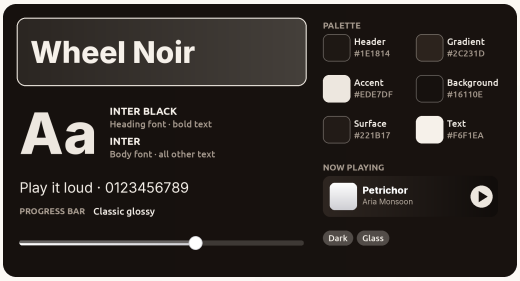

Liquid-chrome header and ice-blue neon straight out of 2001.

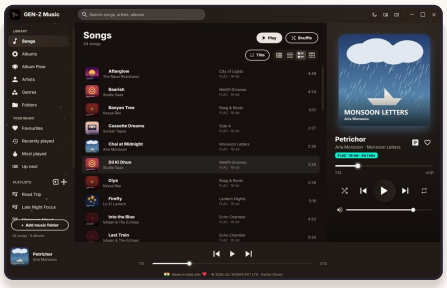

11 Wheel Noir CLASSIC PLAYER

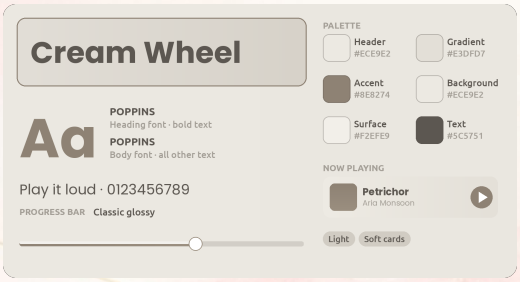

A midnight-black homage to the click-wheel players — crisp white type on deep charcoal.

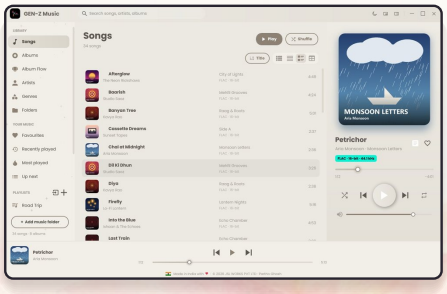

12 Cream Wheel CLASSIC PLAYER

Soft cream and warm grey, like a classic pocket player fresh out of the box.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

13 Pocket Recorder RETRO GADGET

A playful pocket recorder: dotted Doto headings, warm orange and a keypad feel.

Turmeric yellow and green with dancing spectrum bars.

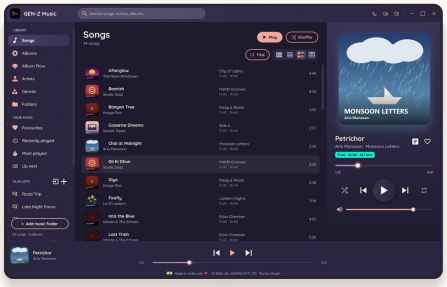

23 Lo-Fi Chill LO-FI

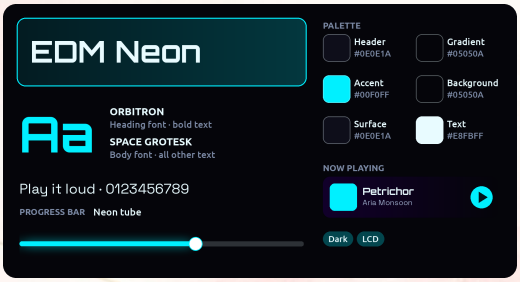

Dusky purple and peach, rounded Quicksand type and gentle snowfall.

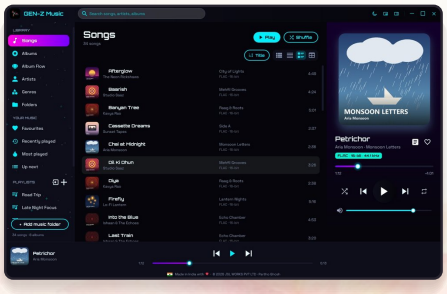

24 EDM Neon ELECTRONIC

Black with cyan and magenta neon, Orbitron headings and electric sparks.

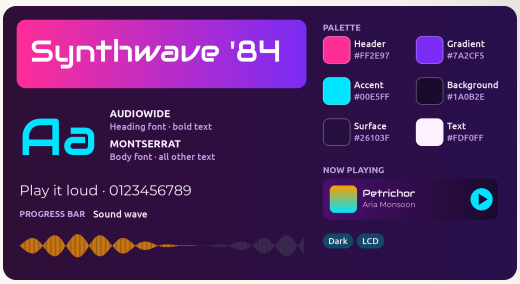

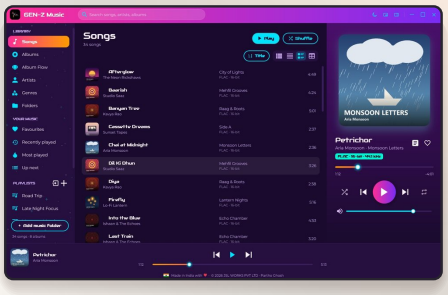

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

25 Synthwave '84 ELECTRONIC RETRO

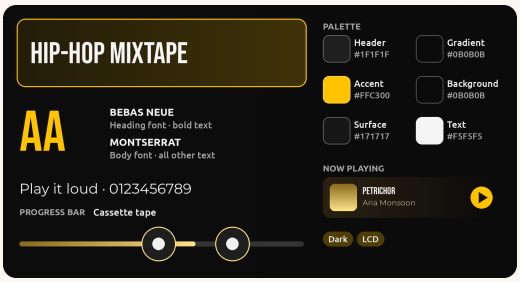

Sunset pink, purple and cyan with a living sound-wave bar.

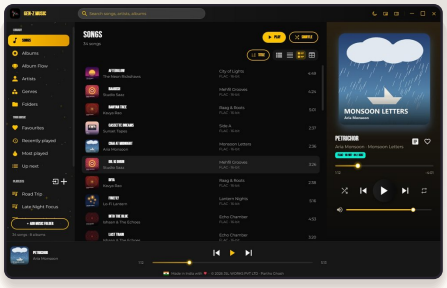

26 Hip-Hop Mixtape HIP-HOP

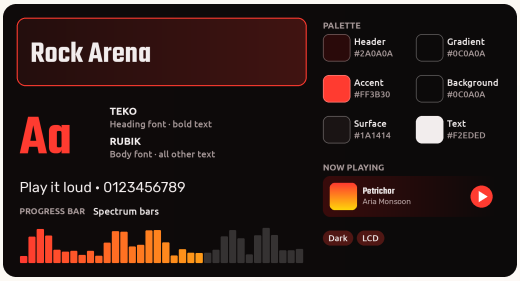

Black and gold, Bebas Neue titles and a turning cassette reel.

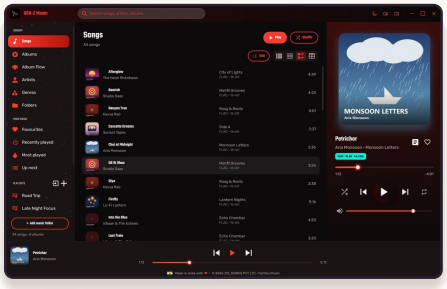

27 Rock Arena ROCK

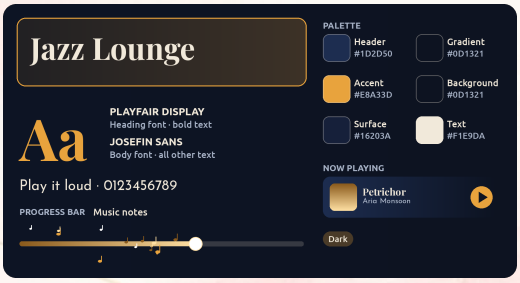

Stage-black and red with Teko type and VU-meter bars.

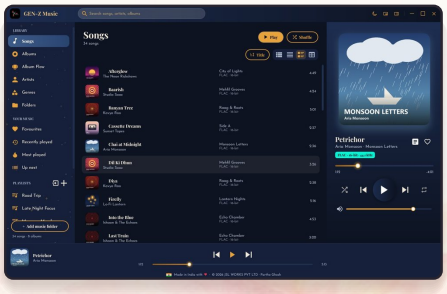

28 Jazz Lounge JAZZ

Midnight navy and brass, Playfair titles, notes rising from a vinyl.

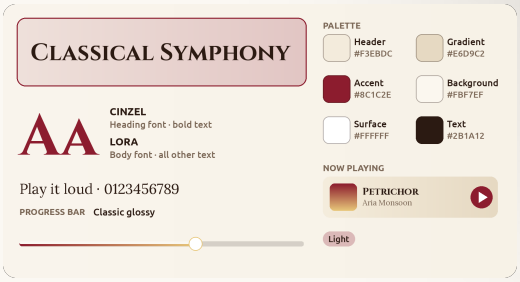

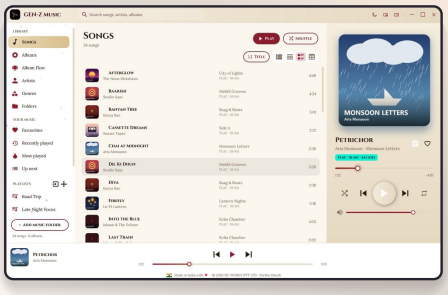

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

29 Classical Symphony CLASSICAL

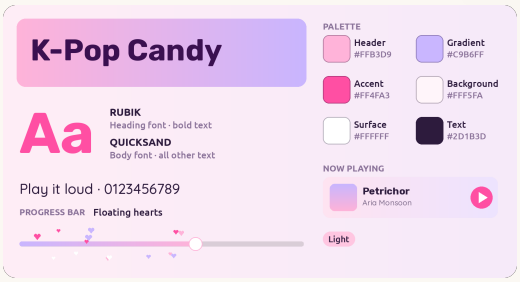

Ivory and burgundy with Cinzel and Lora — a concert-hall programme.

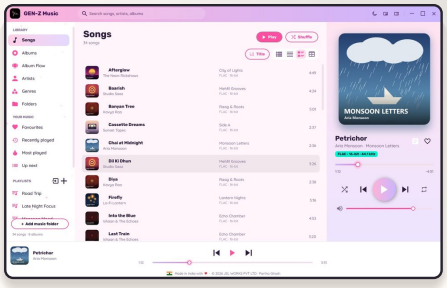

30 K-Pop Candy K-POP

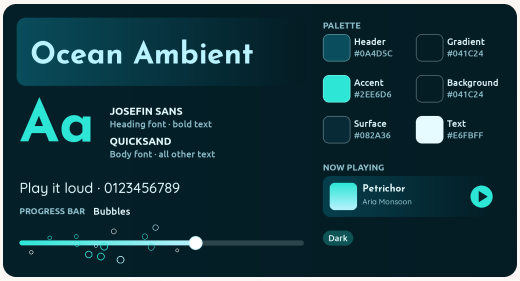

Bubble-gum pink and lavender with floating hearts.

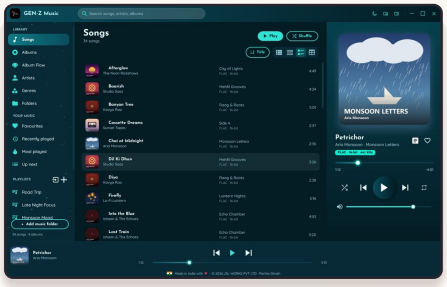

31 Ocean Ambient AMBIENT

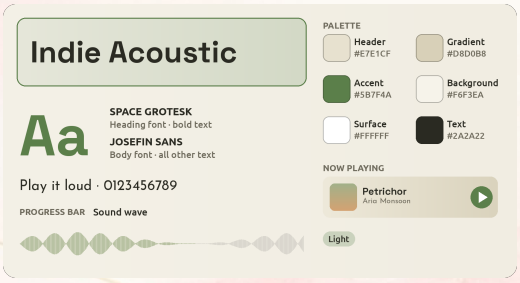

Deep teal water, rising bubbles and a water-ripple cover.

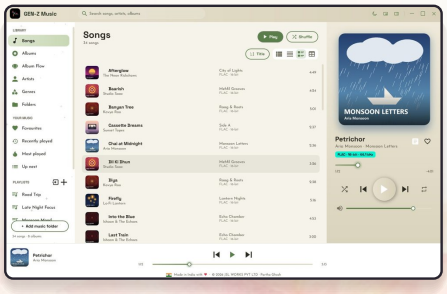

32 Indie Acoustic ACOUSTIC

Warm cream and sage with a gentle wave and autumn leaves.

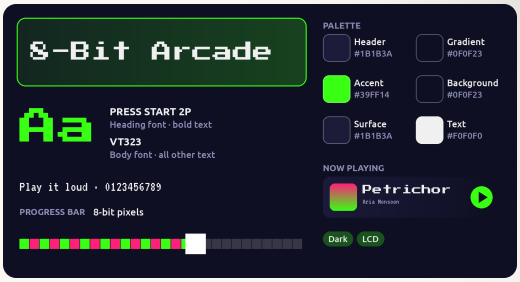

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

33 8-Bit Arcade RETRO GAMES

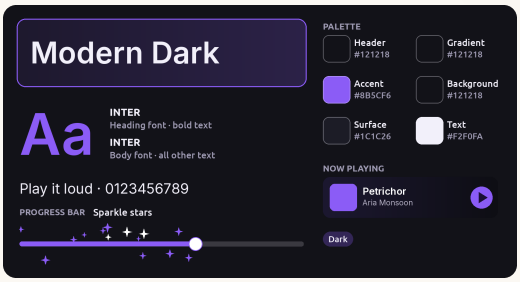

Press Start 2P titles, pixel progress and pixelated covers.

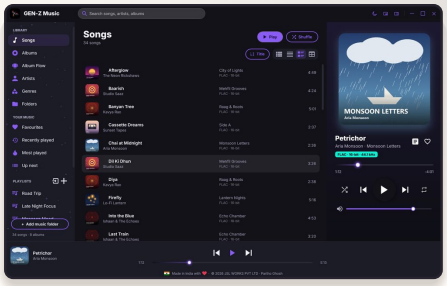

34 Modern Dark EVERYDAY

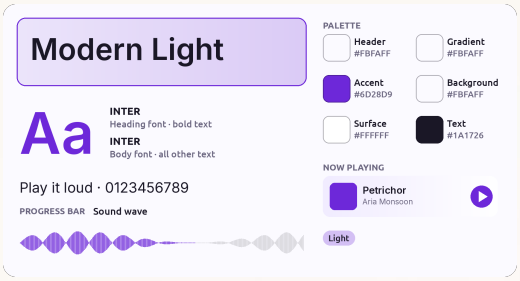

A calm, modern dark theme in soft violet.

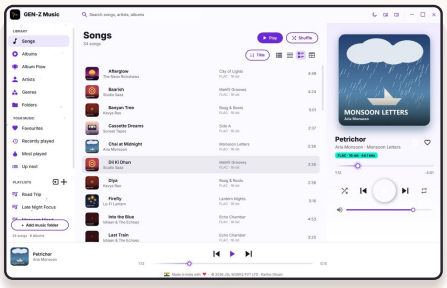

35 Modern Light EVERYDAY

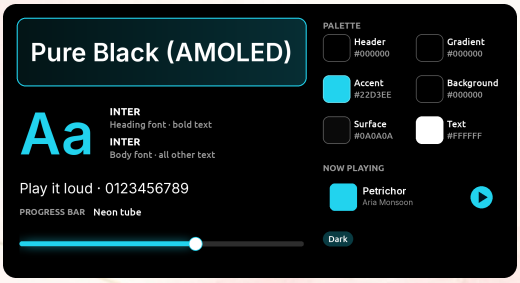

The bright, clean counterpart of Modern Dark.

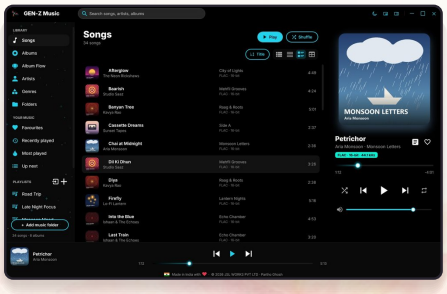

36 Pure Black (AMOLED) OLED

Pure black for OLED screens with a cyan neon bar.

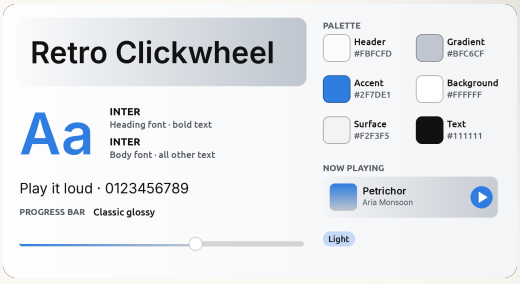

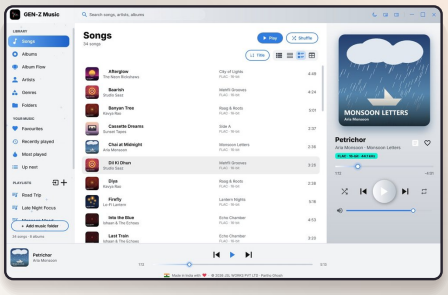

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

37 Retro Clickwheel CLASSIC

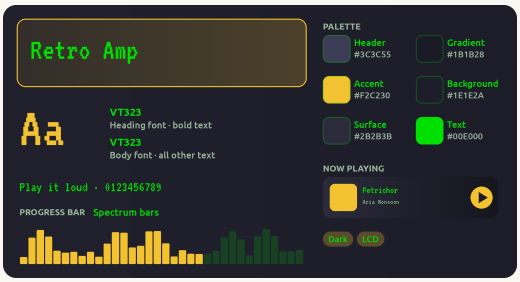

White list, glossy blue selection bar and a classic glossy progress bar.

38 Retro Amp CLASSIC DESKTOP

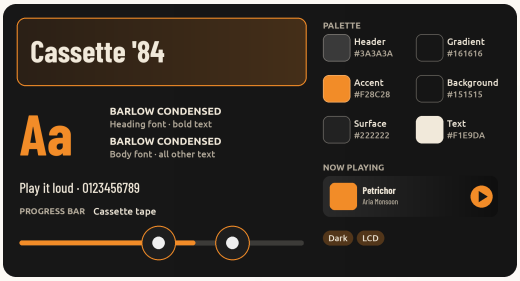

Charcoal chrome with green LCD text — a 90s desktop player.

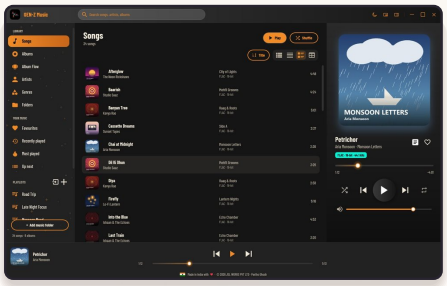

39 Cassette '84 CLASSIC PORTABLE

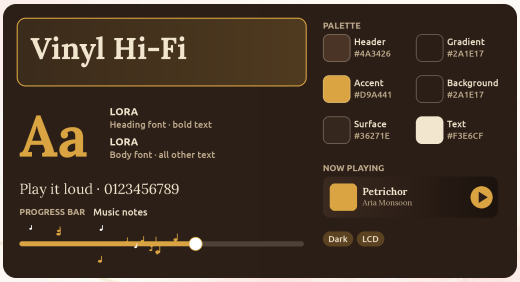

Brushed black and orange buttons from a 1984 pocket player.

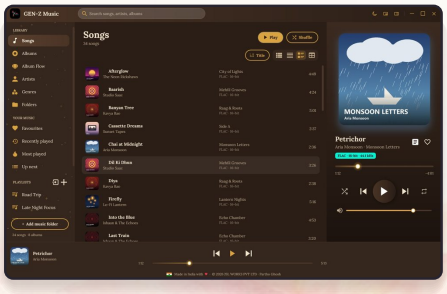

40 Vinyl Hi-Fi CLASSIC HI-FI

Walnut, cream and brass with a spinning-vinyl play-head.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

41 Glossy 2002 CLASSIC

Glossy blue gel buttons and soft pinstripes from the early 2000s.

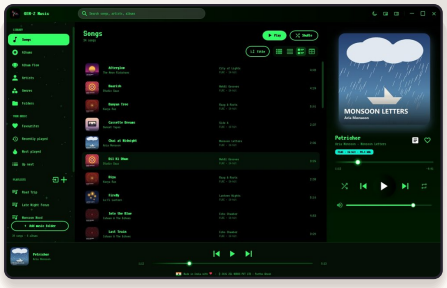

42 Terminal CLASSIC COMPUTER

Phosphor-green text on black, like an old terminal.

CHAPTER 9

Make it move

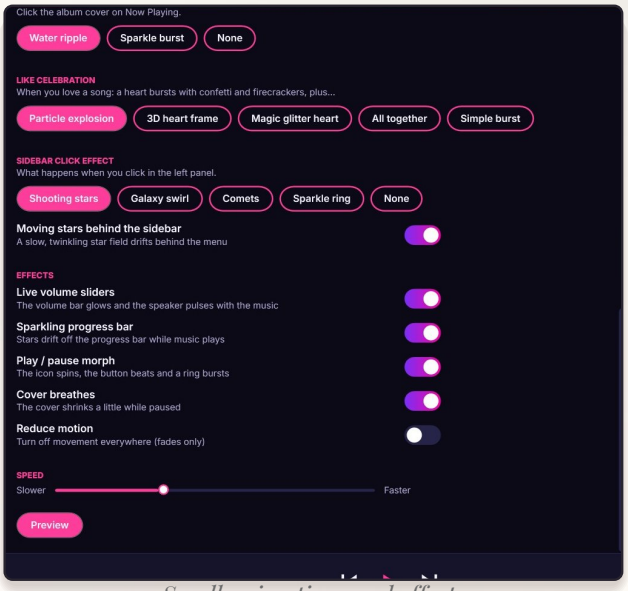

Animations and effects

The Android motion set — and a few surprises of its own.

Open **Animations** in the sidebar. Every change applies instantly, and the **Preview** button plays it for you. GEN-Z animates at your monitor's real refresh rate – 60, 120, 144, 165 or 240 Hz – so everything stays fluid.

Transitions and lists

Scroll animations and effects

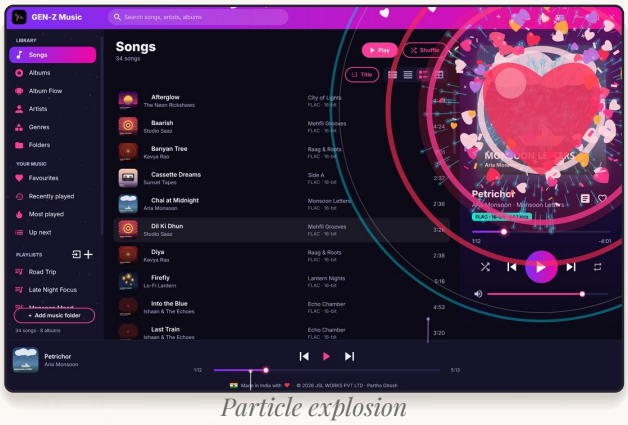

Setting	Choices
Screen transition	GEN-Z slide, Fade, Zoom, Grow, Slide up, Drop, Fold, Swoop, Random or None.
Lists & grids arriving	Bounce in, Cascade, Fade in or None.
List scroll animation	Rows animate as they scroll into view: Wave (left / right), Scale, Fade, Stack from top / bottom, Unfold, Fold, Slide from left / right, Rotate, Fly-in (left / right) or Off.
Scroll curve & length	Accelerate, Decelerate, Accelerate–decelerate, Anticipate, Overshoot, Anticipate–overshoot, Bounce, Cycle or Linear; 150–900 ms.
Cover touch effect	Water ripple, Sparkle burst or None.
Like celebration	Particle explosion, 3D heart frame, Magic glitter heart, All together or Simple burst.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

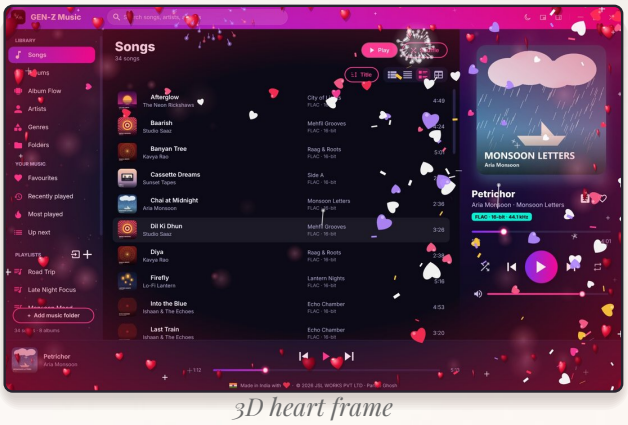

Setting	Choices
Sidebar click effect	Shooting stars, Galaxy swirl, Comets, Sparkle ring or None – plus moving stars behind the sidebar.
Effects	Sparkling progress bar · Play / pause morph · Cover breathes · Live volume sliders (a glow and particles that rise with the music, and sparks from the knob when you change the volume) · Reduce motion.
Speed	Slower to faster for every animation.

Love it!

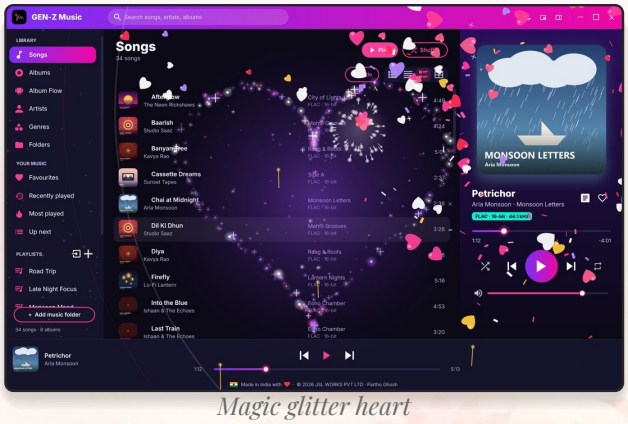

Click the heart and GEN-Z celebrates: the heart jumps, a giant heart pops over the cover and bursts into a shower of hearts and confetti, rockets launch from the bottom of the window – plus the celebration you chose.

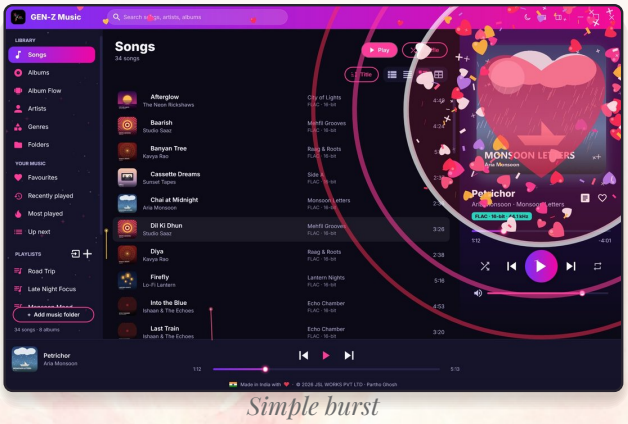

Particle explosion

3D heart frame

Magic glitter heart

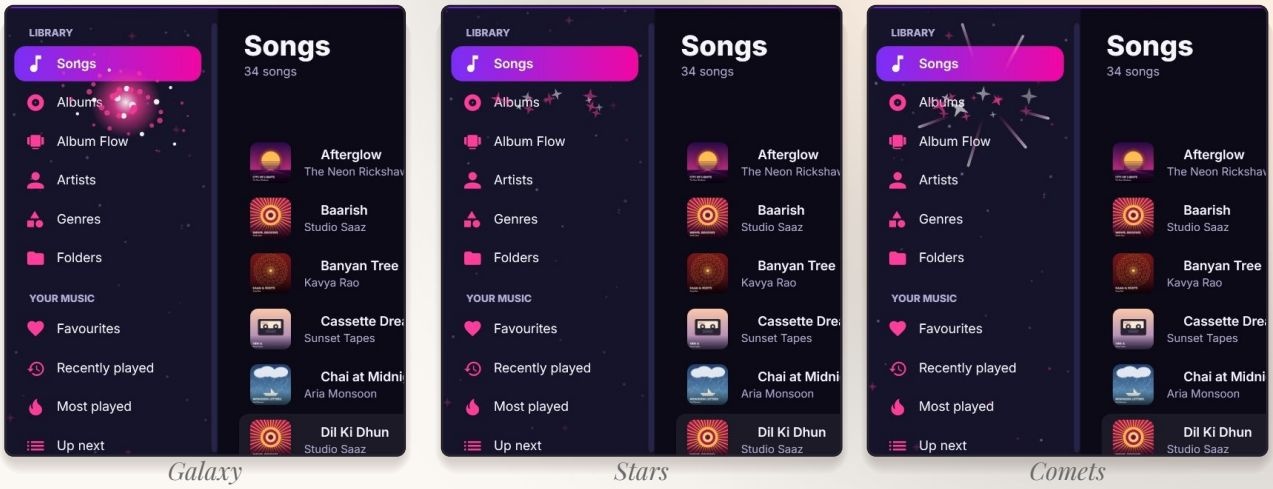

Simple burst

Four ways to love a song.

Space in the sidebar

Click anywhere in the sidebar for a little space show – a galaxy swirl, shooting stars, comets or a sparkle ring – while slow, twinkling stars drift behind the menu.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Galaxy *Stars* *Comets*

Galaxy swirl, shooting stars and comets.

TIP Prefer a calm screen? **Reduce motion** turns movement off everywhere and keeps gentle fades.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 10

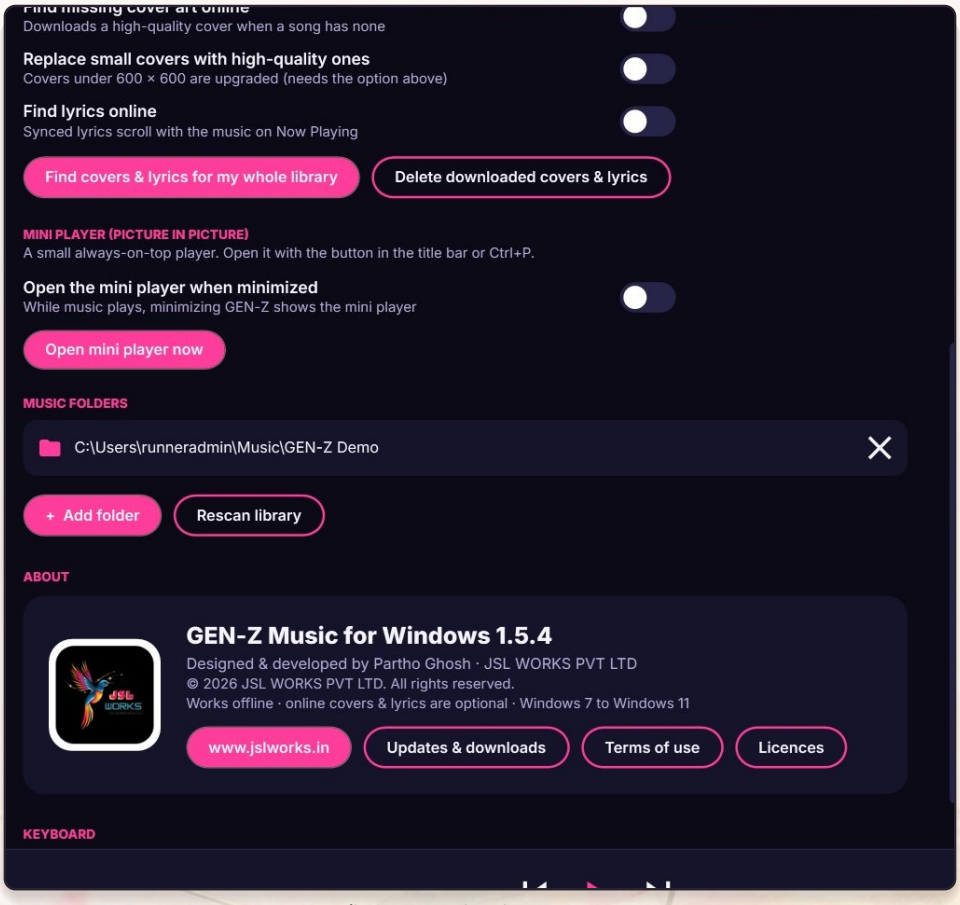

Optional

Cover art, lyrics and track info online

Let GEN-Z find missing covers, synced lyrics and song details — only if you want it to.

GEN-Z works offline. In **Settings & About › Online** you can switch on three optional look-ups:

- **Find missing cover art online** – a high-quality cover (up to 1200 × 1200) when a song has none.
- **Replace small covers with high-quality ones** – upgrades covers smaller than 600 × 600.
- **Find lyrics online** – synced lyrics that scroll with the music.

The optional online settings.

You can also search on demand: right-click songs › **Find cover art & lyrics online**, use **Search lyrics online** on the lyrics panel, or **Find online** in Song info. **Find covers & lyrics for my whole library** works through everything in the background, and **Delete downloaded covers & lyrics** removes them all again.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

WHAT IS SENT Only a song's title, artist, album and length, to Apple iTunes Search, MusicBrainz / Cover Art Archive and LRCLIB. Nothing else leaves your PC. Downloaded artwork and lyrics are for your personal use.

Your music stays on your PC

GEN-Z works offline — online look-ups happen only if you switch them on

STAYS ON YOUR PC

- Songs, covers & lyrics
- Playlists & favourites
- Play counts & history
- Settings & themes

NEVER WITHOUT YOU

- No ads or trackers
- No analytics
- No account needed
- Online look-ups: off unless you switch them on

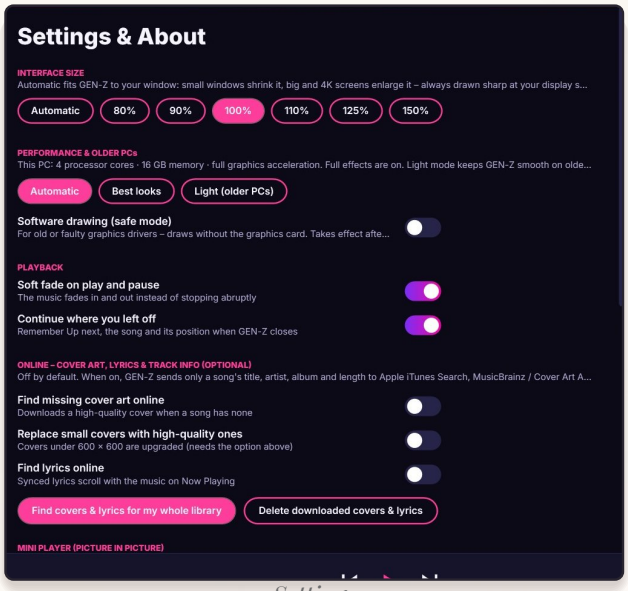

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 11

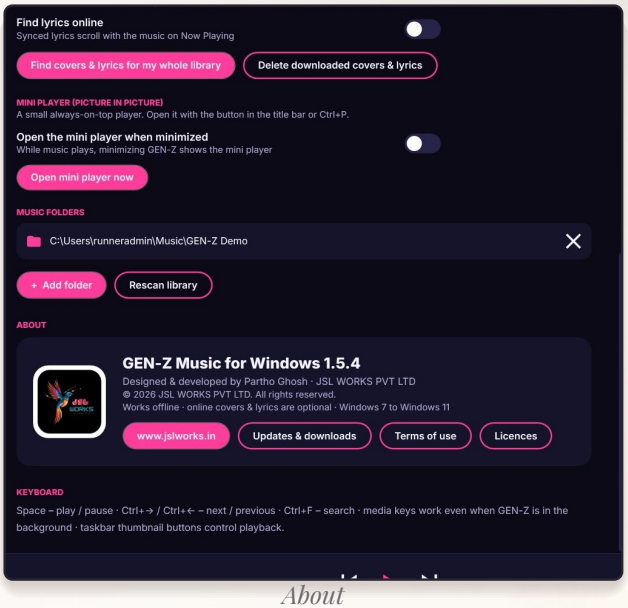

Every option

Settings, sleep timer and shortcuts

Everything else — in one place.

Settings

About

Section	Settings
Interface size	Automatic (fits the window) or 80% – 150%.
Performance & older PCs	Automatic · Best looks · Light (older PCs) · Software drawing (safe mode).
Playback	Soft fade on play and pause · Continue where you left off.
Online	Missing cover art · High-quality covers · Lyrics · Whole library · Delete downloads (chapter 10).
Mini player	Open the mini player when minimized · Open it now.
Music folders	Add folders, remove them, and rescan.
About	Version, website, updates, Terms of use and open-source licences.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

Performance and older PCs

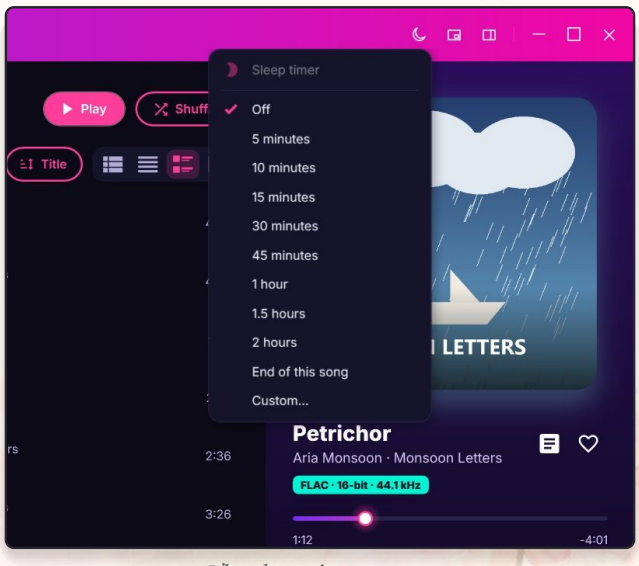

GEN-Z checks your PC when it starts – its graphics, processor cores and memory – and shows what it found under **Settings & About › Performance & older PCs**. With **Automatic**, a PC with basic graphics, two cores or less, or under 4 GB of memory gets **Light mode**; you can also choose **Best looks** or **Light** yourself.

Light mode changes	Why it helps
No star field, sidebar effects or scroll animations	Nothing moves unless you ask it to.
Simple fades between screens and a simple like burst	Far less drawing per frame.
Animations capped at 60 frames a second (30 in safe mode)	Leaves the processor free for the music.
Covers decoded smaller, with lighter scaling	Less memory and faster scrolling.

SAFE MODE If the window flickers, stays black or the graphics driver is very old, turn on **Software drawing (safe mode)** and restart GEN-Z. It draws everything without the graphics card. You can also start GEN-Z once with `--safe` after the program name in a shortcut.

Sleep timer

Click the moon in the title bar and choose 5 minutes to 2 hours, **End of this song** or **Custom…**. A small countdown appears next to the moon. The music fades out gently over the last half-minute and pauses. Choose **Off** to cancel.

The sleep timer menu.

Keyboard and mouse

Control GEN-Z without reaching for the mouse

Space — Play / pause	Ctrl → — Next song	Ctrl ← — Previous song
Ctrl F — Search	Ctrl L — Lyrics	Ctrl I — Song info & tags
Ctrl N — New playlist	Ctrl P — Mini player	Del — Remove from Up next / playlist
Alt ← — Back	Enter — Play the selected song	Esc — Clear the search

Media keys and the taskbar buttons work even when GEN-Z is in the background · mouse back button = Back

Windows integration

- **Media keys** on your keyboard play, pause and skip – even when GEN-Z is in the background.
- **Taskbar buttons:** point at GEN-Z on the taskbar for previous, play / pause and next; the taskbar icon shows the progress.
- **Open with GEN-Z Music:** right-click a music file in File Explorer › Open with.
- **One GEN-Z at a time:** opening a file while GEN-Z runs sends it to the open window.

CHAPTER 12

Quick fixes

Questions and answers

Answers to the things people ask most.

Windows says "Windows protected your PC".

Click **More info › Run anyway**. The warning appears because GEN-Z is not yet signed with a paid certificate.

GEN-Z doesn't start on an older PC.

Install **.NET Framework 4.8** from Microsoft (Setup offers the link), then start GEN-Z again.

Some songs are missing.

Make sure their folder is in **Settings & About › Music folders**, then click **Rescan library**. Supported: MP3, FLAC, WAV, AIFF, M4A / AAC and WMA. Clips shorter than 15 seconds are skipped.

There's no sound.

Check the Windows volume and the output device in the taskbar's sound menu, then press play again. If you plugged in headphones while a song was loaded, skip to the next song.

The equalizer or Home Theater does nothing.

Make sure its switch is on. Both work only inside GEN-Z, not for other apps.

Lyrics don't show.

Put a .lrc file with the same name next to the song, paste lyrics in Song info, or switch on Find lyrics online.

Everything looks too big or too small.

Choose a fixed size in **Settings & About › Interface size**.

GEN-Z feels slow on an old PC.

Choose **Settings & About › Performance › Light (older PCs)**. If the screen flickers or stays black, also turn on **Software drawing (safe mode)** and restart.

Animations feel too busy.

Turn on **Animations › Reduce motion**, or pick None for the transitions you don't want.

GEN-Z closed unexpectedly.

GEN-Z saves the details to `crash.log` in `%APPDATA%\GEN-Z Music`. Please share it via **www.jslworks.in** so it can be fixed.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

How do I go back to the original look?

Open Themes and click **GEN-Z Vivid**.

Where do I get the latest version?

New versions of GEN-Z Music and of this guide are published at **www.jslworks.in/android-devlopment**.

© 2026 JSL WORKS PVT LTD · All Rights Reserved. · www.jslworks.in

CHAPTER 13

Your data stays yours

Privacy and terms

What GEN-Z keeps, where, and what you agreed to.

GEN-Z has no advertising, no analytics and no accounts. Your library index, playlists, favourites, play counts, settings and any downloaded covers or lyrics are stored only on your PC, in `%APPDATA%\GEN-Z Music`.

The End-User Licence Agreement (shown in Setup and under **Settings & About › Terms of use**) gives you a personal licence to use GEN-Z on your own computers. It explains ownership, privacy, the optional online features, updates, the usual limits of warranty and liability, and that it is governed by the laws of India.

Terms of use, as shown the first time a portable copy starts.

ABOUT THIS GUIDE

Music that looks like you.

GEN-Z Music for Windows brings the GEN-Z look and feel to your PC – the same themes, fonts and playful animations as on Android, with a 10-band equalizer, its own Home Theater sound engine and synced lyrics. This guide takes you through every screen, setting and shortcut, with real screenshots and a card for each of its forty-two themes.

- 42 themes, Android motion set, 144 Hz
- 10-band EQ and GEN-Z Home Theater
- Playlists, synced lyrics, mini player
- Works offline – online look-ups optional
